Under Massachusetts State Law the City Council has sole jurisdiction over the creation of designated stops on the public way for fixed route regional transit authority and other private jitney vehicles on the public way under City ownership. However, the regional transit authority has jurisdiction over the routes that their vehicles take. Therefore, City and WRTA staff typically work together to coordinate the routes and the stops based on current and future potential demand. DTM staff has confirmed with the Worcester Regional Transit Authority that there is currently no WRTA bus that travels down this portion of Lake Avenue and at this time they have no intention of expanding the service.

Recommendation: Based on the information provided above, staff recommends the following
