

# ABOUT US

## Who We Are and What We Do

The Worcester Green Corps (WGC) is a public/private partnership between the Worcester Regional Chamber of Commerce, the City of Worcester, the United Way of Central Massachusetts, and several other community partners and generous sponsors. As Worcester experiences new levels of investment and economic growth, it is in everyone's collective interest to make sure the city is clean and inviting to residents and visitors alike. WGC establishes a year-round effort leveraging the involvement of the business and nonprofit communities to keep Worcester clean, green, and proactive in implementing beautification and environmental best practices throughout the city.

In addition to the year-round cleanup and beautification efforts, WGC partners with the Worcester Community Action Council through their YouthWorks program to provide income and job training to Worcester's youth. The career pathways program offers learning experience and exposure to a variety of educational pathways and environmental careers for local youth.

## Looking to Get Involved?

Then you're in luck! The WGC is looking for volunteers, community groups, and businesses to participate in city-wide cleanups. We are also seeking sponsors and donors to make this program possible for years to come.

## Want More Info?

For more info on the WGC, contact Miranda Hotham, WGC Coordinator
