2-2-17 - Referred to the following motion to the Standing Committee on Finance and Operations:

Response of the Administration to the request to provide a report regarding Charter School Tuition Assessment and then refer it to the Standing Committee on Finance and Operations for further discussion.

Within the district's budget since FY12, within Account 500-92204, the Administration has recommended that funds be reserved in a line item to adjust for the final state budget actions on charter school tuition assessments and reimbursements. The example from the FY17 budget is included as follows from page 199:

	FY16	FY16 Actual	FY17	%
	Adopted	Expenditures	Approved	Change
	Budget		Budget	From
				Present
				Budget
(2000) E. Non-Recurring Textbook	\$350,000	\$1,481,321	\$350,000	0%
Purchases				

This budget reflects the anticipated increase in charter school tuition assessment that will result from the final state assessment in July. Historically, the charter school tuition assessments included in the House of Representative's budget are lower than the final assessment determined in July. The Administration would utilize these funds for instructional purposes during the summer months should funds become available after the final assessments are known.

During the past six fiscal years, the district has held aside \$350,000 annually for this purpose. The following tables show the amounts for charter school tuition assessment and reimbursement that have been included in the annual budget (based on the amounts included in the House Ways and Means budget) and compared to the final state budget:

Charter School Reimbursement	\$2,179,528	\$1,815,469	-\$364,059
Total Budget Change			-\$446,864

Given this level of difference between the House Ways and Means Budget and the actual final state budget each year, it has become necessary to budget this reserve of funds in a manner to lessen the impact on other areas of the budget in least disruptive manner.

City - Kindergarten IA			\$280,000
Total General Fund	\$322,965,803	\$152,760,938	-\$375,560

At this point in the fiscal year, a total of \$152,760,938 (47%) has been expended or committed. A description of the projected balances is as follows:

Budget Impacts:

Instructional Assistants (-\$752,769): Due to the elimination of the Quality Kindergarten, the general fund was re-allocated to include funding for 21 full-time equivalent. Replacement positions, salaries and contractual payments are included in this projected balances. The ending balance is based on the Superintendent's on-going work with the City Manager to mitigate this grant loss.

Special Education Tuition (-\$596,786): The tuition account reflects updated estimated tuition payments through the end of this year based on student fiscal responsibility and approved tuition rate increases for residential placements. This account also represents the processing of several necessary prior year payments, as well as new student placements for the current fiscal year.

Transportation (-\$156,091): Due to the current condition of the district's fleet, the district needed to add one special education route using third party services. These additional routes are anticipated through the end of the school year. This account also represents an increase for the vehicles utilized for the special education Transitions program. The School Committee authorized the Administration to enter into lease agreements for special education vehicles to reflect the need to expedite the renewal of the existing fleet. The district is developing contracts for the lease of 10 buses during later this fiscal year. This account also represents the addition of two mid-day routes through the end of the school year.

Workers Compensation (-\$391,353): The current deficit is based on actual expenditures, as well as projections through the end of the year. The weekly salary cost have been consistently higher and include approximately thirty-five staff collecting weekly benefits. Also, several settlements have been processed during this fiscal year.

Personal Services (-\$49,478): The special education department has continued with the restructure of specialized services for our special education students in order to increase internal capacity. During the summer, the district eliminated the use of third party vendors to provide better instructional support to our students. These funds (\$400,000) have been reallocated to both instructional technology, as well as salary accounts. However, this account includes an increase to the district's legal consultation (-\$70,000) and translation service line items (-\$250,000), security guard contracted rates (-\$30,000) and nursing services contract rates, as well as an increase with necessary student services (-\$100,000).

Accounts with Projected Balances to Offset Deficit Accounts:

Instructional Materials (\$588,301): The balance in this account is for the charter school assessment increase typically utilized to address a reduction of the budget at the time the City does the tax recap process. The city did not reduce the WPS budget this year in order to partially cover the cost of the district's Instructional Assistants due to the elimination of the Quality Kindergarten grant. Due to the current projected year ending balance, the amount also reflects the use of additional instructional material per pupil allocation of \$10 per student that is frozen to start the year.

Educational Support (\$401,653): The projected balance of this account is due to the reallocation of several ESL tutor positions. During the summer, several of these positions have been reallocated to teacher positions. There is also several vacant ESL positions and the projection includes replacement positions through the remainder of the year.

Utilities (\$89,421): Due to the addition of several solar projects and the summer conditions, electricity usage through September was much lower than anticipated. This amount also reflects the increased in delivery rates effective October 1st approved by the Massachusetts Department of Public Utilities. The supply rates remain under contract through the end of February 2017.

The Administration recommends the following transfer of funds at this time.

Annex A (1 page) contains a copy of the Administration's response to the item.

The Worcester Public Schools is preparing to implement a parent access solution that will provide school bus arrival information at school bus stop locations for each separate trip operated by each school bus. This information will be available through an application that will directly integrate data from the school bus routing program and the school bus on the road, providing the current location of the school bus and estimated time of arrival at the stop. Parents/guardians will be able to log in from home or a mobile device, with minimal setup required, locating a school bus. Families with multiple students attending different schools will be able to choose any one of the students and instantly locate the school bus. Logins are secure and unique for each family.

This application is part of an upgrade to the school bus routing program used by Worcester Public Schools that is expected to be installed, functional and available for pilot testing before the end of the current school year. There is no additional cost to the Worcester Public Schools for this feature within the routing program upgrade.
