CERTIFICATION

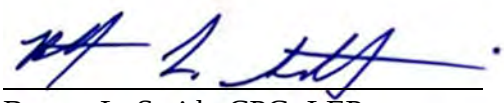
Wilcox & Barton, Inc. certifies the information presented in this report is factual and accurate to the best of its knowledge. This assessment was performed in accordance with American Society for Testing and Materials Standard E 1527-21 through a site inspection, interviews with persons knowledgeable of property operations, conditions, and history, and a review of reasonably attainable public records. It was not possible to verify all of the information developed or received within a reasonable amount of time. The findings and conclusions presented in this report are based on professional judgment and interpretation of the information and data obtained during this assessment.

Barrett L. Smith, CPG, LEP, Senior Hydrogeologist, conducted the site inspection, reviewed state and local records, and was the primary author of this report. Mr. Smith is an environmental professional with 22 years of environmental consulting experience and has prepared and managed numerous environmental site assessments.

David JP Foss, CPG, LSP, Principal Hydrogeologist, has reviewed the document for accuracy, content, and quality of presentation. Mr. Foss is an environmental professional with 27 years of environmental consulting experience and has prepared and managed numerous environmental site assessments.

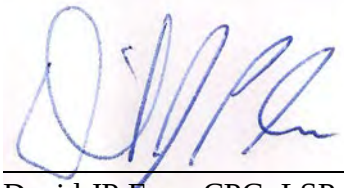
Qualifications summaries are presented in Attachment A to this report.

The undersigned herein declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional (as defined in §312.10 of 40 CFR§312) and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the property. We have developed and performed the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.



Barrett L. Smith, CPG, LEP
Senior Hydrogeologist

Date: August 17, 2022



David JP Foss, CPG, LSP
Principal Hydrogeologist

Date: August 17, 2022

EXECUTIVE SUMMARY

Wilcox & Barton, Inc. has completed a Phase I Environmental Site Assessment of the parcel of land identified as 484 Main Street, Worcester, Massachusetts, in conformance with the scope and limitations of American Society for Testing and Materials Standard E1527-21. The following findings are drawn from the information developed during this assessment.

The subjects of this assessment include a commercial building located at 484 Main Street with an additional entrance at 25 High Street and a large parking lot adjacent to 41 Chatham Street in the City of Worcester, Massachusetts. For the purposes of this report, these addresses will be referred to as Parcels 1, 2, and 3. Parcel 1 (484 Main Street) has approximately 36 units primarily used as office space and 20 separate owners. Including the basement, it is a 7-story brick and stone building. Parcel 2 (25 High Street) is a 2- and 4-story brick and concrete building with an additional side parking lot. Parcel 3 (Parking lot on Chatham Street) is a large parking lot without any buildings.

Recognized environmental conditions (RECs), including *historical recognized environmental conditions (HRECs) and controlled recognized environmental conditions (CRECs)*, and *de minimis conditions* were evaluated by a site inspection and area reconnaissance, interviews with knowledgeable persons, review of local, state, and federal records and databases, and review of historical aerial photographs and other records.

Certain conditions that raise a potential concern but that do not meet the definition of a REC are identified herein as "other environmental concerns." The conditions identified as "other environmental concerns" are presented for User awareness but do not appear to pose a threat to the subject parcel. The evaluation revealed no RECs or other conditions of concern, <u>with the exception of the following</u>:

1. <u>Release of No. 4 fuel oil on the subject property</u>. A release of No. 4 fuel oil from a ruptured aboveground feed line was identified at 484 Main Street on March 11, 2011. Release Tracking Number (RTN) 2-18124 was assigned to the release. Response actions included recovery of free oil, oily water, and oily snow from affected areas (including the sunken area surrounding the smokestack), deployment and recovery of granular absorbent material, and power washing of affected surfaces using a mixture of hot water and detergent. A total of 575 gallons of oily liquid, 6,400 pounds of oily solids (absorbents) and 2,100 pounds of oily water, snow, and debris were removed from the site. Post-remediation soil sampling revealed no evidence of residual contamination. On October 24, 2011, a Class A-1 Response Action Outcome (RAO) was submitted to the Massachusetts Department of Environmental Protection (MassDEP) indicating that that contamination had been reduced to background. Based on regulatory closure of this release in accordance with the Massachusetts Contingency Plan (MCP), the 2011 release of No. 4 fuel oil is considered an HREC (Map Key 1).
2. <u>Potential ACM in subject property building</u>. According to the EDR report, asbestos abatement projects were completed in 2011, 2013, and 2020. These efforts appear to have been limited to sections of roofing and pipe insulation, and as such, there is the potential for additional asbestos-containing material (ACM) to be present in the Denholm building. Potential ACM in the building constitutes an "other environmental concern" with respect to the subject property (Map Key 2).

3. Release of fuel oil on the subject property. In February 2021, a release of fuel oil was identified during the in-place closure of a 3,000-gallon underground storage tank (UST). While the tank was located on the subject property, it reportedly served the abutting property at 6 Chatham Street. The UST was pumped and cleaned. Soil samples collected from below the tank revealed elevated petroleum hydrocarbon concentrations in soil. Based on the results of subsequent subsurface investigations, petroleum contamination appears to be limited in horizontal extent, but the vertical extent below the tank is not well defined and no groundwater monitoring was conducted to evaluate potential impacts in the area. Based on a Method 3 Risk Characterization, Campbell Environmental, Inc. (CEI) concluded that a Permanent Solution has been achieved and that site conditions pose No Significant Risk to human health, safety, public welfare, or the environment. It is the opinion of Wilcox & Barton, Inc. that the Method 3 Risk Characterization is incorrect because soil exposure point concentrations are calculated using data from an apparent "hot spot" as defined in the MCP and soil data appear to be inappropriately used to evaluate risk associated with indoor air exposures. This finding is classified as a REC (Map Key 3).
4. Historical dry-cleaning operation on nearby property. According to the database report, a dry-cleaner operated at 12 Pleasant Street from approximately 1996 through 2002. The Dooley's Cleaners operation appears to have been located on the property now identified as 446 Main Street. In 2001, ENSR submitted a Class B-1 RAO to MassDEP documenting site closure for a release of arsenic to soil (RTN 2-13636). Although the site plan identifies a "Former Dry Cleaner" on the property, there does not appear to have been any evaluation of presence/absence of chlorinated volatile organic compounds (VOCs) in environmental media. Given that the subject property is located within approximately 150 feet downgradient from the former Dooley's Cleaners facility, undocumented releases of chlorinated VOCs to environmental media have the potential to affect conditions of the subject property. This finding constitutes an "other environmental concern" with respect to the subject property (Map Key 4).
5. Historical industrial operations on the subject property. Prior to use as a department store, the western portion of the subject property (Parcel 2) was used for a boot and shoe manufacturing operation for an unknown period. This finding constitutes a REC with respect to the subject property, as undocumented releases of oil and/or hazardous materials (OHM) are likely in association with industrial operations (Map Key 5).
6. Historical plating and printing operations on adjacent upgradient properties. Historical plating operations apparently took place on the fourth floor of an industrial building at the west end of Barton Place, upgradient from Parcel 2 and approximately co-located with the existing Worcester Plaza parking garage. Printing operations took place on the third floor of the Clark-Sawyer building which abuts Parcel 1 to the north. These operations likely included the use or storage of OHM. However, because the only identified source of information about these businesses is the historical Sanborn Maps, and there is not corroborating information about chemical use, storage, or historical releases, historical plating and printing operations on adjacent upgradient properties is considered an "other environmental concern" (Map Key 6).

7. Historical business operations. Historical city directories indicate that a photography studio operated on Parcel 1 during the 1960s and 1970s. This operation may have included the use or storage of OHM. However, because the only identified source of information about this business is the City Directories, and there is not corroborating information about chemical use, storage, or historical releases, the historical business operations at the subject site are considered an "other environmental concern" (Map Key 7).

8. Historical underground petroleum storage with no closure documentation. According to records provided by the Trust, a fuel oil UST that historically served the subject property building was removed in 2012 by Petroleum Management Services. The size of the UST is unknown. Waste generated during UST closure included 4,090 gallons of virgin No. 4 fuel oil and 960 gallons of oily water. No UST Closure Report of other documentation of environmental conditions following removal of the UST has been provided to Wilcox & Barton, Inc. The 1969 deed for the property also references a gasoline dispensing facility on the subject property. Historical underground storage of petroleum with no closure documentation constitutes a REC with respect to the subject property. (Map Key 8)

9. Oil staining around drums stored on Parcel 2. An area of oil staining was observed around a drum of chassis oil and other unlabeled drums near the boiler room on Parcel 2. According to Fire Department records, MassDEP issued a Notice of Non-Compliance (NON) to Meredith & Grew Incorporated (Meredith & Grew) at 484 Main Street for hazardous waste and air quality violations in April 1996. The MassDEP inspection report noted the presence of oil-filled 5-gallon buckets under and near the boilers; this finding is consistent with observations during this assessment. Given the apparent multi-decade history of leaks from the boilers on Parcel 2, this finding is considered a REC. (Map Key 9)

10. Anthropogenic fill and smokestack bottom ash. Several piles of granular material mixed with construction debris including tile, brick, metal pipe, and concrete fragments were observed in the basement on Parcel 1, and a roughly 10-cubic yard pile of granular fill was observed at the south end of Parcel 3. The smokestack on Parcel 2 was likely constructed in the late 1800s to serve the coal-fired Walker & Brown Boot & Shoe Factory. Although the duration of use of the smokestack is unknown, it presumably has some (potentially large) volume of bottom ash accumulated at the base of the structure. The presence of anthropogenic fill and bottom ash on the subject property is considered an "other environmental concern," as special handling of these materials may be required during redevelopment (Map Key 10).

11. Staining near basement floor drain. One floor drain was observed in the basement of Parcel 1. Apparent oil staining was observed on the floor around this drain. Because the discharge location of the floor drain is unknown and could be a pathway to the subsurface, this finding is considered a REC with respect to the subject property (Map Key 11).

12. Apparent hydraulic oil-impacted sump. An apparent hydrocarbon sheen was observed in a sump adjacent to the central elevator shaft on Parcel 1, and a trash bag full of oil-soaked pads was staged on a concrete abutment adjacent to the sump. According to the property manager, the central elevator was taken out of service and the hydraulic oil was pumped into the two 55-gallon drums staged near the elevator. The proximity of the oil-soaked pads to the elevator and an apparent oil-impacted sump constitutes a REC (Map Key 12).

13. Potential subsurface discharge of boiler blow-down. According to the 1996 NON issued to Meredith & Grew by MassDEP, treatment chemicals are added to the boilers. Boiler blow down, which may contain high concentrations of metals, is discharged to the municipal sewer system. Given that a failed sewer connection was identified in 2017, and it is unclear how long the failed line existed before it was identified and when/if it was repaired, it is possible that boiler blowdown has been discharged directly to the subsurface under the subject property building. This finding is considered a REC (Map Key 13).

14. Polychlorinated biphenyl (PCB) oil on the subject property. Two transformers, both labeled "askarel filled transformer" were observed in the electrical rooms on Parcels 1 and 2. Askarel is a trade name for PCB oil. No staining was observed in the vicinity of the transformers. Several other pieces of electromechanical equipment such as pumps, generators, and compressors were observed in the basement. Given the age of this equipment, it is possible it they contain PCB oil. Because special handling of equipment containing PCB oil will be required during redevelopment, this finding is considered an "other environmental concern" with respect to the subject property (Map Key 14).

15. Underground storage of electrical equipment/long-term operation of electrical substation on the subject property. According to the property manager, a vault containing electrical equipment owned by National Grid is under the landing at the top of the stairs on the basement level of Parcel 2. The presence of this vault is consistent with the 1936 and 1950 Sanborn maps, which identify an electrical substation on Parcel 2. Given the unknown contents and construction of the vault there is a potential for leaks of cable oil and/or mineral oil dielectric fluid (MODF) into the vault, and potential for tracking of oil potentially containing PCBs in and around the vault. Because responsibility for clean-up, if warranted, would be the responsibility of the electric company, this finding is considered an "other environmental concern" (Map Key 15).

The findings summarized above and described herein are supported by the following attachments.

User Reliance

This report has been prepared by Wilcox & Barton, Inc. for the use and benefit of, and may be relied upon by, the City of Worcester and its respective lenders, affiliates, subsidiaries, and assigns.

In accordance with the timeline requirements of the ASTM standard, this report may be considered valid until January 14, 2023.

SUMMARY OF FINDINGS

INTRODUCTION	
Property Address/Tax ID	484 Main Street, Worcester, Massachusetts The subject property consists of 36 commercial condominium units, each with a separate tax identification, collectively known as the Denholm Condominium Trust (the Trust): • 03-20B-U-010 • 03-20C-U-300 • 03-20C-U-480 • 03-20B-U-050 • 03-20C-U-320 • 03-20C-U-500 • 03-20B-U-100 • 03-20C-U-330 • 03-20C-U-510 • 03-20B-U-105 • 03-20C-U-340 • 03-20C-U-515 • 03-20B-U-110 • 03-20C-U-345 • 03-20C-U-520 • 03-20B-U-120 • 03-20C-U-350 • 03-20C-U-530 • 03-20B-U-150 • 03-20C-U-360 • 03-20C-U-535 • 03-20B-U-170 • 03-20C-U-400 • 03-20C-U-540 • 03-20B-U-180 • 03-20C-U-420 • 03-20C-U-560 • 03-20B-U-200 • 03-20C-U-430 • 03-20C-U-570 • 03-20B-U-250 • 03-20C-U-450 • 03-20C-U-580 • 03-20B-U-280 • 03-20C-U-460 • 03-20C-U-600 The subject property consists of three sub-parcels. For the purposes of this report, we refer to "Parcel 1," with the address 484 Main Street, and "Parcel 2" with the address 25 High Street. Parcels 1 and 2 are connected via an enclosed bridge over Chase Court. "Parcel 3" is a parking lot adjacent to 41 Chatham Street approximately 300 feet west of Parcel 2 at its closest point. The locations of Parcels 1, 2 and 3 are depicted on Figure 2.
Date of Site Visit	July 26, 2022
User	City of Worcester
Anticipated Use of the Property	To Be Determined
Special Terms & Conditions	None.
Scope of Work	See Attachment B.

PROPERTY DESCRIPTION	
Parcel Size	The total area of the subject property is approximately 2.3 acres. There is a discrepancy between the Worcester GIS map and the owner's understanding of the limits of the subject property. According to Mr. Doug Morris of NAI Glickman Kovago & Jacobs, property manager for the Trust, the building immediately north of the Denholm building (described below) on Parcel 2, including a gated enclosure housing two backup generators, is not owned by the Trust, but is part of the Lightower Fiber Networks LLC property at 472 Main Street. As such, this building and the gated enclosure were not accessed during the site reconnaissance.
Improvements	Parcel 1 includes a 5- and 6-story brick and concrete commercial condominium historically referred to as the "Denholm Building". The Denholm Building currently houses offices and storefronts for several businesses and non-profit organizations. The Denholm Building crosses Chase Court on the third-floor level such that Parcel 2 includes a 2- and 4-story brick and concrete commercial condominium. Parcel 3

SUMMARY OF FINDINGS

PROPERTY DESCRIPTION	
	includes an approximately 52,200-square-foot parking lot located at the corner of Chatham Place and Chatham Street, adjacent to 41 Chatham Street. Abutted by two large brick buildings, this lot is accessible by Chatham Street and Irving Street.
Current/Most Recent Use	The Denholm Building is a currently a commercial condominium complex. Parcel 3 is a private parking lot for use by members of the Trust and its tenants. Prior to conversion to a commercial condominium, the property was operated as a department store by the Denholm & McKay Company (a.k.a., Denholm's)
Vicinity Characteristics	The properties are in a commercial area of Worcester that is zoned for general business. Surrounding properties are in mixed commercial, residential, and municipal use.
North	North of Parcel 1 is Lightower Fiber Networks LLC (472 Main Street) and beyond that, Barton Place. North of Parcel 2 is a 193,440-square-foot, multi-level parking garage (Worcester Plaza Garage). North of Parcel 3 is Chatham Street, beyond which are paved parking lots.
East	East of Parcel 1 is the intersection of Main Street and Franklin Street, beyond which is Worcester City Hall and City Hall Common. East of Parcel 2 is Chase Court and Parcel 1. East of Parcel 3 is Houchin Avenue and the St. Paul's Religious Education facility
South	South of Parcel 1 is a 120,000-square-foot parking lot (518 Main Street). South of Parcel 2 is a 2- and 5-story commercial building with associated parking lot (6 Chatham Street). South of Parcel 3 is a 3,806-square-foot, 3-story brick commercial building (39 Irving Street) and a 38,261-square-foot commercial low-rise office building (38 Austin Street).
West	West of Parcel 1 is Chase Court and beyond that, Parcel 2. West of Parcel 2 is a Worcester Public Schools administrative building, The Fanning Building (24 Chatham Street). West of Parcel 3 is a 4-story brick apartment building (29 Chatham Street).

ENVIRONMENTAL SETTING	
Topography	Parcels 1 and 2 are on an east-facing hillslope with elevation approximately 480 feet above mean sea level along Main Street and approximately 510 feet above sea level at the High Street entrance. The topography of Parcel 3 slopes to the south from approximately 500 feet along Chatham Street to approximately 485 feet above mean sea level at the southern end of the property. *Source*: Topographic Map: Worcester North, MA quadrangle, 7.5-minute, 2018
Surface Water	No surface water bodies are located within the bounds of the subject property The closest surface water body is Lincoln Pond, located approximately 0.75 miles northeast of the subject property in the City of Worcester's Elm Park.
Flood Plain Data	The subject property is located within an area of minimal flood hazard. *Source*: Flood Insurance Rate Map Number 25027C Panel 0618E

SUMMARY OF FINDINGS

ENVIRONMENTAL SETTING	
Geology	Soil: Urban Land. *Source*: US Department of Agriculture (USDA) Soil Conservation Service Bedrock: Bedrock underlying the subject property is mapped as the Lower Devonian-/Silurian-aged Worcester Formation (carbonaceous slate and phyllite and minor meta-graywacke). *Source*: Bedrock Geologic Map of Massachusetts (1983)
Hydrogeology	Based on local topography, groundwater is inferred to flow in a southeasterly direction toward the Blackstone River.

USER PROVIDED INFORMATION	
Property Owners/ Acquisition Dates	According to the Worcester County Registry of Deed, the subject property was purchased by the Denholm & McKay Company in 1969. The owners and acquisition dates of the various condominium units are listed below: 03-20B-U-010 – Denholm Condominium Trust – May 24, 1994 03-20B-U-050 – Denholm Condominium Trust – May 24, 1994 03-20B-U-100 – PPM V Partnership LP – November 10, 1994 03-20B-U-105 – Denholm Condominium Trust – May 24, 1994 03-20B-U-110 – Denholm Condominium Trust – May 24, 1994 03-20B-U-120 – Manahem Ben Bichitte, III – September 22, 2021 03-20B-U-150 – Denholm Condominium Trust – June 25, 2008 03-20B-U-170 – Southeast Asian Coalition of Central Massachusetts, Inc. – July 17, 2018 03-20B-U-180 – Choice 1 Realty LLC – January 31, 2020 03-20B-U-200 – Worcester Community Action, Council, Inc. – July 19, 1994 03-20B-U-250 – Worcester Community Action, Council, Inc. – July 19, 1994 03-20B-U-280 – Worcester Community Action, Council, Inc. – July 19, 1994 03-20C-U-300 – United Way of Central Massachusetts – January 1, 1988 03-20C-U-320 – Denholm Condominium Trust – May 26, 2009 03-20C-U-330 – Robert E. SUMMARY OF FINDINGS

REGULATORY DATABASE DISCUSSION	
Wilcox & Barton, Inc. contracted Environmental Data Resources, Inc. (EDR) to perform an environmental database search. A comprehensive review of the relevant regulatory databases revealed no environmental database findings or sites posing a risk to the subject parcels, except for those described below.	
Subject Property **Finding 1** Release of No. 4 fuel oil on the subject property ☐ REC ☑ HREC ☐ CREC ☐ *De minimis condition* ☐ Other	**484 Main Street – Denholm Building** *Databases*: Massachusetts Reportable Release Database (MA RELEASE), Massachusetts Asbestos (MA ASBESTOS), Massachusetts Environmental Notification Form (MA ENF), Massachusetts Recovered Government Archive (RGA). Wilcox & Barton, Inc. reviewed available information associated with the listed properties using the MassDEP searchable sites database. Copies of reports with an associated MassDEP RTN are accessible online at the following link. As such, full copies of these publicly available documents are not appended to this report. https://eeaonline.eea.state.ma.us/portal#!/search/wastesite A release of No. 4 fuel oil from a ruptured aboveground feed line was identified at 484 Main Street on March 11, 2011, and RTN 2-18124 was assigned to the release. Response actions included recovery of free oil, oily water, and oily snow from affected areas (including the sunken area surrounding the smokestack), deployment and recovery of granular absorbent material, and power washing of affected surfaces using a mixture of hot water and detergent. A total of 575 gallons of oily liquid, 6,400 pounds of oily solids (absorbents) and 2,100 pounds of oily water, snow, and debris were removed from the site. Post-remediation soil sampling revealed no evidence of residual contamination. On October 24, 2011, a Class A-1 Response Action Outcome (RAO) was submitted to MassDEP indicating that that contamination had been reduced to background. Based on regulatory closure of this release in accordance with the Massachusetts Contingency Plan (MCP), the 2011 release of No. 4 fuel oil is considered an HREC. According to the EDR report, asbestos abatement projects were completed at the subject property in 2011, 2013, and 2020. These efforts appear to have been limited to sections of roofing and pipe insulation, and as such, there is the potential for additional asbestos-containing material (ACM) to be present in the Denholm Building. Potential ACM in the building constitutes an “other environmental concern” with respect to the subject property.
Finding 2 Potential ACM in subject property building. ☐ REC ☐ HREC ☐ CREC ☐ *De minimis condition* ☑ Other	

SUMMARY OF FINDINGS

REGULATORY DATABASE DISCUSSION	
Subject Property **Finding 3** Release of fuel oil on the subject property ☑ REC ☐ HREC ☐ CREC ☐ *De minimis* condition ☐ Other	**6 Chatham Street – Emengini Educational Trust LLC** *Databases*: MA RELEASE, RCRA Non-Gen/NLR In February 2021, a release of fuel oil was identified during the in-place closure of a 3,000-gallon underground storage tank (UST) that was located on the subject property but served the abutting property at 6 Chatham Street. The UST was pumped and cleaned. Soil samples from below the tank revealed elevated petroleum hydrocarbon concentrations in soil. Based on the results of subsequent subsurface investigations, the residual petroleum contamination appears to be limited in horizontal extent, but the vertical extent below the tank is not well defined and no groundwater monitoring was conducted to evaluate potential impacts in the area. Based on results of an MCP Method 3 Risk Characterization, CEI concluded that a Permanent Solution has been achieved and that site conditions pose No Significant Risk to human health, safety, public welfare or the environment. It is the opinion of Wilcox & Barton, Inc. that the results of the Method 3 Risk Characterization prepared by CEI are not supported by the data in that soil exposure point concentrations are calculated using data from an apparent "hot spot" as defined in the MCP. The soil data appear to be inappropriately used to evaluate risk associated with indoor air exposures. This finding therefore constitutes a REC.
Adjacent Property	**12 High Street – Massachusetts Electrical Company** *Databases*: MA RELEASE According to the EDR report and files reviewed on the MassDEP online database, a sudden release of oily water to a roadway occurred at 12 High Street on November 1998; RTN 2-12507 was assigned to the release. The release area is immediately northwest of Parcel 2. Immediate Response Action (IRA) activities included an application of sand to contain the oily water. A vactor truck was brought on site to remove the sand as well as sediment and debris inside three impacted catch basins. On January 19, 1999, a Class A-1 RAO was submitted MassDEP indicating that a permanent solution had been achieved and the release no longer represented risks to public health, safety, welfare, and the environment. Based on this information, the 1998 release of oily water at 12 High Street is not expected to affect environmental conditions on the subject property.
Adjacent Property	**24 Chatham Street - Fanning Building WPS** *Databases*: MA RELEASE, Massachusetts Underground Storage Tank Database (MA LUST) According to the *Class A-2 RAO and IRA Completion Report* prepared by Corporate Environmental Advisors, Inc. (CEA) and dated June 12, 2008, a release of heating oil was identified during the removal of a 10,000-gallon UST from the Fanning Building property on June 3, 2007; RTN 2-16780 was assigned to the release. IRA activities included the removal of state regulated material from the UST, removal of impacted soil, removal of the UST, and removal of drums from the property. Based on the results of a Method 3 Risk Characterization was performed, CEA concluded that no significant risk of harm to safety, public welfare and the environment exist at the site

REGULATORY DATABASE DISCUSSION	
	under current conditions. A Class A-2 RAO was submitted to MassDEP on June 12, 2008. Based on the results of post-remediation groundwater monitoring, residual petroleum contamination at 24 Chatham Street is not expected to affect environmental conditions on the subject property.
Adjacent Property **Finding 4** Historical dry-cleaning on adjacent property ☐ REC ☐ HREC ☐ CREC ☐ *De minimis* condition ☑ Other	**Dooley's Cleaners – 12 Pleasant Street** According to the EDR report, a dry-cleaner operated at 12 Pleasant Street from approximately 1996 through 2002. The Dooley's Cleaners operation appears to have been located on the property now identified as 446 Main Street. In 2001, ENSR submitted a Class B-1 RAO to MassDEP documenting site closure for a release of arsenic to soil (RTN 2-13636). Although the site plan identifies a "Former Dry Cleaner" on the property, there does not appear to have been any evaluation of presence/absence of chlorinated volatile organic compounds (VOCs) in environmental media. Given that the subject property is located within approximately 150 feet downgradient from the former Dooley's Cleaners facility, undocumented releases of chlorinated VOCs to environmental media have the potential to affect conditions of the subject property. This finding constitutes an "other environmental concern" with respect to the subject property.
Adjacent/Nearby Properties	**38 High Street – St. Paul's Cathedral Rectory and 52 High Street – St. Joseph's Home for Women** *Databases*: MA RELEASE, MA ASBESTOS, MA LUST Several co-mingled releases of heating oil from various USTs have been identified on the Diocese of Worcester property at 38 High Street and extending onto the south abutting former St. Josephs Home for Women property at 52 High Street. Based on the disposal site boundary presented in the *Phase V Completion Report and Class A RAO Statement* for RTN 2-10900 prepared by Cushing, Jammallo & Wheeler, Inc. (CJW), the residual petroleum hydrocarbons in soil and groundwater at 38 and 52 High Street are not expected to affect environmental conditions on the subject property.
Nearby Property	**526-538 Main Street, Jet 1 Hour Cleaning Co., Inc., Mass Development** *Databases*: MA RELEASE, EDR Historical Cleaner, Massachusetts Hazardous Waste Generator (MA HW GEN) According to the July 2020 *Tier Classification Report* for RTN 2-20962 prepared by Tighe & Bond, a release of chlorinated VOCs attributed to historical dry-cleaning operations in a portion of the 526-538 Main Street building was identified during subsurface investigations in March 2019. Based on the distribution of chlorinated VOCs in groundwater and the position of 526-536 Main Street cross- to downgradient from the subject property, the identified release of chlorinated VOCs is not expected to affect environmental conditions on the subject property.

SUMMARY OF FINDINGS

HISTORICAL USES	
Sanborn Maps	
Subject Property **Finding 5** Historical industrial use of the subject property. ☑ REC ☐ HREC ☐ CREC ☐ *De minimis condition* ☐ Other	**1892** Parcel 1 is developed with a multi-unit commercial building (the "Clarks Building") with the address 484-500 Main Street and labeled Currier & Son Insurance Offices, Business College, and The Boston Store (Dry Goods). The building on Parcel 1 included "heating boilers underground with roof" and two elevators. Chase Court is labeled "Passage Way." Parcel 2 is developed with the Walker & Brown Boot & Shoe Factory (heated using coal and lit using natural gas), a two-unit residential dwelling with addresses 21 and 23 High Street, and a single unit dwelling at 29 High Street. Parcel 3 is developed with a 4-unit residential dwelling (25-31 Chatham Street), a 2-unit residential dwelling (35-38 Irving Street), three single family dwellings at 11, 13, and 15 Chatham Place, and three additional dwellings labeled as "E", "F", and "G" Chatham Place, and a stable at 11½ Chatham Place. Prior to use as a department store, the western portion of the subject property (Parcel 2) was used for a boot and shoe manufacturing operation for an unknown period. This finding constitutes a REC with respect to the subject property. **1910** The Clarks Building is now entirely occupied by The Boston Store, and The Boston Store now occupies a portion the former Walker & Brown building for use as a warehouse with the E.M. Bliss Co Slipper Factory occupying the norther portion of the building. The existing smokestack on Parcel 2 is depicted. Parcel 3 is unchanged from the 1892 map. **1936 and 1950** The Clarks Building has been demolished and replaced with a structure that appears roughly consistent with the existing Denholm building and labeled Denholm & McKay Co. Dept. Store. The two-unit residential dwelling at 21 and 23 High Street has been demolished and replaced with a two-story addition to the Denholm Building. A Worcester Electric Light Co. substation is labeled on the first floor of the Denholm building west of Chase Court. The E.M Bliss Co Slipper Factory area is now labeled "Loft Building." The dwelling at 29 High Street has been demolished and replaced by a Y.W.C.A dormitory. Parcel 3 is unchanged from the 1910 map. **1978** The Denholm building is labeled as vacant on all floors and the Worcester Electric Light Co. substation is no longer labeled. The Y.W.C.A dormitory at 29 High Street has been demolished. All of structures on Parcel 3 have been demolished.
Adjoining Properties	**1892** North of Parcels 1 and 2 are a Steam Laundry facility and a nickel-plating shop at the west end of Barton Place. The Clark-Sawyer Building (473-482 Main Street) includes the Clark-Sawyer Co. House Furnishing store, a billiards parlor, a printing shop, and a dining hall. A dense cluster of commercial, residential, and industrial development is

HISTORICAL USES	
	depicted north of the subject property including the Central Livery stables and boarding, Metropolitan Storage and Packaging, a fire station, a stove and pluming shop, and various warehouses. To the south is a Y.M.C.A (under construction), Highland House, and the Knowles Building (512-522 Main Street) which houses offices and an upholstery shop. Properties adjoining Parcel 3 are in residential use.
Finding 6 Historical plating and printing operations on adjacent upgradient properties. ☐ REC ☐ HREC ☐ CREC ☐ *De minimis* condition ☑ Other	<u>Historical plating and printing operations on adjacent upgradient properties.</u> Historical plating operations apparently took place on the fourth floor of an industrial building at the west end of Barton Place, upgradient from Parcel 2 and approximately co-located with the existing Worcester Plaza parking garage. Printing operations took place on the third floor of the Clark-Sawyer building which abuts Parcel 1 to the north. These operations likely included the use or storage of OHM. However, because the only identified source of information about these businesses is the historical Sanborn Maps, and there is not corroborating information about chemical use, storage, or historical releases, historical plating and printing operations on an adjacent upgradient properties is considered an "other environmental concern." **1910** Minor changes to adjoining properties north of Parcels 1 and 2 include the conversion of the Clark-Sawyer Co. House Furnishing store to the Worcester Business Institute. To the south, the Y.M.C.A is now labeled Young Women's Christian Association (Y.W.C.A). The Knowles Building is still present; however, the upholstery operation appears to have been discontinued. Properties adjacent to Parcel 3 remain unchanged. **1936** No businesses are indicated in association with the Clark-Sawyer building. The John C. MacInnes Co. furniture warehouse is depicted north of Parcels 1 and 2 at 6 Barton Place. The Knowles building has been converted for use as dance hall. St. Paul's Parochial School has been constructed east of Parcel 3 at 23 Chatham Street, and Saint Joseph's Home has been constructed at 52 High Street. A multi-unit apartment building has been constructed west of Parcel 3 on the corner of Chatham and Irving Streets. **1950** No businesses are indicated in association with either the Clark-Sawyer building or the Knowles building. One residential lot south of Parcel 3 (40 Austin Street) has been converted to a parking lot. **1978** The Knowles building and the Y.W.C.A building have been demolished. The John C. MacInnes Co. building has been demolished and a large open deck parking garage (presumably the existing Worcester Plaza parking garage) has been constructed north of Parcel 2. No other changes to adjacent properties were evident.

SUMMARY OF FINDINGS

HISTORICAL USES	
Aerial Photographs	
Subject and Adjoining Properties	**1938** Poor resolution, but roughly consistent with 1936 Sanborn map. **1952** Consistent with 1950 Sanborn map **1960, 1966, 1972, 1975** Generally consistent with 1978 Sanborn map except that the Worcester Plaza parking garage has not been constructed. **1985, 2008, 2012, 2016** Consistent with current conditions.
Historical Topographic Maps	
Subject and Adjoining Parcels	**1886/1889, 1892, 1908, 1934/1935, 1939, 1947/1950, 1948, 1953, 1960, 1973/1974, 1975, 1983, 1985, 2012, 2015, 2018** Due to the urbanized nature of the site, the historical topographic maps do not provide sufficient resolution to discern additional details regarding the properties and surrounding area.
City Directories Wilcox & Barton, Inc. contracted EDR to perform a search of relevant historical city directories. A review of directories for the years 1962, 1968, 1973, 1979, 1984, 1988, 1992, 1995, 2000, 2005, 2010, 2014, and 2017 identified no apparent property uses posing a risk to the subject property with the following exception.	
Subject Property **Finding 7** Historical business operations. ☐ REC ☐ HREC ☐ CREC ☐ De minimis condition ☑ Other	**1962, 1968, 1973** 484 Main Street listed as *Wheelan Studios Photography*. <u>Historical business operations</u>. The photography studio operation may have included the use or storage of oil and/or hazardous materials. However, because the only identified source of information about this business is the City Directories, and there is not corroborating information about chemical use, storage, or historical releases, the historical business operations at the subject site are considered an "other environmental concern."

SITE RECONNAISSANCE	
Inspection Date(s)	July 26, 2022
Photographs	See Attachment E.
Access restrictions	Wilcox & Barton, Inc. was provided access to common areas of the subject property and representative office spaces in the Denholm Building. There is a large safe in the basement portion of Parcel 1 to which the owner does not have access. According to Mr. Morris, there is also a storeroom in the basement level on Parcel 2 used by WCAC, which was accidentally omitted from the reconnaissance. Mr. Morris stated that this room includes a series of large belt-driven pulleys, presumably associated with the Walker & Brown Boot & Shoe Factory. No access was provided to the

SUMMARY OF FINDINGS

SITE RECONNAISSANCE	
	interior of the smokestack on Parcel 2. It is the opinion of Wilcox & Barton, Inc. that these access restrictions did not affect our ability to draw conclusions about Recognized Environmental Conditions at the subject property, as such these access restrictions are not considered a significant data gap.
Petroleum Products and Hazardous Substances	Wilcox & Barton, Inc. identified various-sized containers of petroleum products and/or hazardous substances during the site inspection, as described below. Parcel 1: A one-gallon container of epoxy thinner, two 55-gallons drums of hydraulic oil, and a trash bag containing apparent oil-soaked pads were observed in the basement. Parcel 2: Paints, wood stain, boiler cleaner, latex binder, wood preservative, contact cement, oil sand and/or granular absorbent, microbicides, and other building maintenance products and chemicals are stored in 5-gallon and smaller containers in the basement. Three 15-gallon pressure cylinders containing helium, freon refrigerant, and forane refrigerant were observed in the basement of Parcel 2.
Aboveground and Underground Storage Tanks	Wilcox & Barton, Inc. observed the following ASTs during the site reconnaissance: • 1 approximately 200-gallon hydraulic oil AST associated with the central elevator on Parcel 1; • 1 approximately 1,000-gallon upright, reinforced steel AST of unknown contents; • 1 approximately 5,000-gallon AST of unknown contents; • 1 approximately 200-gallon upright steel AST of unknown contents; • A chemical feed tank connected to the boilers on Parcel 2. No evidence of spills or leaks associated with these tanks was observed. No evidence of USTs was observed during the site reconnaissance.
Finding 8 Historical underground petroleum storage with no closure documentation. ☑ REC ☐ HREC ☐ CREC ☐ *De minimis* condition ☐ Other	Historical underground petroleum storage with no closure documentation. According to records provided by the Trust, a fuel oil UST that historically served the Denholm Building was removed from the property in 2012 by Petroleum Management Services, Inc. of Reading, Massachusetts. The size of the UST is unknown. Waste generated during UST closure included 4,090 gallons of virgin No. 4 fuel oil and 960 gallons of oily water. No UST Closure Report of other documentation of environmental conditions following removal of the UST has been provided to Wilcox & Barton, Inc. The 1969 deed for the property references "the gasoline pump, accessories thereto, and tank in said twenty foot way belonging to the Standard Oil Company of New York…". Wilcox & Barton, Inc. has found no other information concerning this gasoline dispensing equipment during this investigation. Historical underground storage of petroleum with no closure documentation constitutes a REC with respect to the subject property.

SUMMARY OF FINDINGS

SITE RECONNAISSANCE	
Odors	A sewage odor was noted in the northern portion of the basement on Parcel 1. This odor may be related to a broken sewer line identified by the Worcester Department of Public Works in November 2017 (refer to documents included in Attachment F). No other strong, pungent, or noxious odors were encountered during the site reconnaissance
Drums **Finding 9** Oil staining around drums stored on Parcel 2. ☑ REC ☐ HREC ☐ CREC ☐ *De minimis* condition ☐ Other	The following drums were observed during the site reconnaissance: • Two 55-gallon drums of hydraulic oil in the basement of Parcel 1. • Three unlabeled 55-gallon drums near the boiler room on Parcel 2. • One 55-gallon drum labeled waste oil near the boiler room on Parcel 2. • Two empty 30-gallon blue polyethylene drums labeled ammonium hydroxide near the boiler room on Parcel 2. • One approximately 20-gallon drum of chassis oil near the boiler room on Parcel 2. An area of oil staining was observed around the drum of chassis oil and the unlabeled drums near the boiler room. According to Fire Department records, on April 1996, MassDEP issued a Notice of Noncompliance (NON) to Meredith & Grew Incorporated (Meredith & Grew) at 484 Main Street for hazardous waste and air quality violations. The MassDEP inspection report notes the presence of oil-filled 5-gallon buckets placed under and near the boilers; this condition was also noted during this assessment. Given the apparent multi-decade history of leaks from the boilers on Parcel 2, this finding is considered a REC.
Solid Waste Disposal **Finding 10** Anthropogenic fill and smokestack bottom ash. ☐ REC ☐ HREC ☐ CREC ☐ De minimis condition ☑ Other	Several piles of granular material mixed with construction debris including tile, brick, metal pipe, and concrete fragments were observed in the basement on Parcel 1 and a roughly 10 cubic yard pile of granular fill was observed at the south end of Parcel 3. Some trash was observed in the sunken enclosure surrounding the smokestack on Parcel 2. The smokestack was likely constructed in the late 1800s to serve the coal-fired Walker & Brown Boot & Shoe Factory. Although the duration and time of use the smokestack is unknown, it presumably has some (potentially large) volume of bottom ash accumulated at the base of the structure. The presence of anthropogenic fill and bottom ash on the subject property is considered an "other environmental concern," as special handling of these materials may be required during redevelopment.
Stained Ground Surfaces and Stressed Vegetation	No stained ground surfaces or stressed vegetation were observed during the site reconnaissance.
Wells	One apparent monitoring well was observed in Chase Court.

SUMMARY OF FINDINGS

SITE RECONNAISSANCE	
Floor Drains & Wastewater Management **Finding 11** Staining near basement floor drain. ☑ REC ☐ HREC ☐ CREC ☐ De minimis condition ☐ Other **Finding 12** Apparent hydraulic oil-impacted sump. ☑ REC ☐ HREC ☐ CREC ☐ De minimis condition ☐ Other **Finding 13** Potential subsurface discharge of boiler blow-down. ☑ REC ☐ HREC ☐ CREC ☐ De minimis condition ☐ Other	*Floor Drains and Sumps*: One floor drain was observed in the basement of Parcel 1. Apparent oil staining was observed on the floor around this drain. Because the discharge location of the floor drain is unknown and could be a pathway to the subsurface, this finding is considered a REC with respect to the subject property. Several sumps were observed in the basement of Parcel 1, with standing water present in most of the sumps. An apparent hydrocarbon sheen was observed in a sump adjacent to the central elevator shaft on Parcel 1, and a trash bag full of oil-soaked pads was staged on a concrete abutment adjacent to the sump. According to Mr. Morris, the central elevator was taken out of service, and the hydraulic oil was pumped into the two 55-gallon drums staged near the elevator. The proximity of the oil-soaked pads to the elevator and an apparent oil-impacted sump constitutes a REC. *Oil/Water Separator:* No oil-water separators were observed on the subject property. *Drywells*: No evidence of dry wells was observed on the subject property. *Industrial Wastewater*: Wilcox & Barton, Inc. observed a water treatment system in the basement of Parcel 2. According to the 1996 NON issued to Meredith & Grew by MassDEP, treatment chemicals are added to the boilers, and boiler blow down, which may contain high concentrations of metals, is discharged to the municipal sewer system. Given that that a failed sewer connection with identified in 2017, and it is unclear how long the failed line existed before it was identified and when/if it was repaired, it is possible that boiler blowdown has been discharged directly to the subsurface under the Denholm Building. This finding is considered a REC.
Septic Systems	No evidence of septic systems was observed at the time of inspection. The Denholm Building is serviced by the City of Worcester sanitary sewer system.
Potable Water	The Denholm Building is serviced by municipal water.

SUMMARY OF FINDINGS

SITE RECONNAISSANCE	
Transformers and PCB-Containing Equipment **Finding 14** Presence of PCB oil on the subject property. ☐ REC ☐ HREC ☐ CREC ☐ De minimis condition ☑ Other **Finding 15** Underground storage of electrical equipment/ long-term operation of electrical substation on the subject property. ☐ REC ☐ HREC ☐ CREC ☐ *De minimis* condition ☑ Other	Two transformers, both labeled "Askarel Filled Transformer" were observed in the electrical rooms on Parcels 1 and 2. Askarel is a trade name for polychlorinated biphenyl (PCB) oil. No staining was observed in the vicinity of the transformers. Several other pieces of electromechanical equipment such as pumps, generators and compressors were observed in the basement. Given the age of this equipment, it is possible it they contain PCB oil. Because special handling of equipment containing PCB oil will be required during redevelopment, this finding is considered an "other environmental concern" with respect to the subject property. According to Mr. Morris, a vault containing electrical equipment owned by National Grid is under the landing at the top of the stairs on the basement level of Parcel 2. The presence of this vault is consistent with the 1936 and 1950 Sanborn maps, which identify an electrical substation on Parcel 2. Given the unknown contents and construction of the vault, the long-term potential for leaks of cable oil and/or mineral oil dielectric fluid (MODF) into the vault, and potential for tracking of oil potentially containing PCBs in and around the vault, this finding is considered a REC.
Spills and Other Conditions	An area of oil staining was observed on the concrete floor on the landing at the top of the stairs on the basement level of Parcel 2. As discussed above, several pieces of disused electromechanical equipment and ASTs with unknown contents are staged in this area.
Pits, Ponds, or Lagoons	Other than the basement sumps described above, no pits ponds or lagoons were observed on the subject property.
Stormwater Management	One stormwater catch basin is located at the south end of Parcel 3.
Vapor Intrusion	No current conditions posing a potential vapor intrusion risk were readily apparent. Further study of soil and groundwater conditions would be necessary to assess vapor intrusion risks.

INTERVIEWS	
Information from the following sources has been incorporated throughout this report.	
User/Potential Buyer	Greg Ormsby and Peter Dunn – City of Worcester Executive Office of Economic Development.
Current Owner	Doug Morris – NAI Glickman Kovago & Jabobs, property manager for the Denholm Condominium Trust.

SUMMARY OF FINDINGS

INTERVIEWS	
Municipal/State Sources	Worcester Assessor's Office Worcester Inspectional Services Department Worcester Fire Department Worcester County Registry of Deeds Massachusetts Department of Environmental Protection

DISCUSSION OF RECOGNIZED ENVIRONMENTAL CONDITIONS AND OTHER FINDINGS	
Map Key	**Description**
Finding 1 **Map Key 1** ☐ REC ☑ HREC ☐ CREC ☐ De minimis condition ☐ Other	Release of No. 4 fuel oil on the subject property. A release of No. 4 fuel oil from a ruptured above-ground feed line was identified at 484 Main Street on March 11, 2011, and RTN 2-18124 was assigned to the release. Response actions included recovery of free oil, oily water, and oily snow from affected areas (including the sunken area surrounding the smokestack), deployment and recovery of granular absorbent material, and power washing of affected surfaces using a mixture of hot water and detergent. A total of 575 gallons of oily liquid, 6,400 pounds of oily solids (absorbents) and 2,100 pounds of oily water, snow and debris were removed from the site. Post-remediation soil sampling revealed no evidence of residual contamination. On October 24, 2011, a Class A-1 Response Action Outcome (RAO) was submitted to MassDEP indicating that that contamination had been reduced to background. Based on regulatory closure of this release in accordance with the Massachusetts Contingency Plan (MCP), the 2011 release of No. 4 fuel oil is considered an HREC.
Finding 2 **Map Key 2** ☐ REC ☐ HREC ☐ CREC ☐ De minimis condition ☑ Other	Potential ACM in the subject property building. According to the EDR report, asbestos abatement efforts were completed at the subject property in 2011, 2013, and 2020. These efforts appear to have been limited to sections of roofing and pipe insulation, and as such, there is the potential for additional ACM to be present in the Denholm building. Potential ACM in the building constitutes an "other environmental concern" with respect to the subject property.
Finding 3 **Map Key 3** ☑ REC ☐ HREC ☐ CREC ☐ De minimis condition ☐ Other	Release of fuel oil on the subject property. In February 2021, a release of fuel oil was identified during the in-place closure of a 3,000-gallon UST located on the subject property, but historically serving the abutting property at 6 Chatham Street. The UST was pumped and cleaned, and soil samples collected from below the tank revealed elevated petroleum hydrocarbon concentrations in soil. Based on the results of subsequent subsurface investigations, the residual petroleum contamination appears to be limited in horizontal extent, but the vertical extent below the tank is not well defined, and no groundwater monitoring was conducted to evaluate potential impacts in the area. Based on results of an MCP Method 3 Risk Characterization, CEI concluded that a Permanent Solution has been achieved and that site conditions pose No Significant Risk to human health, safety, public welfare or the environment. It is the opinion of Wilcox & Barton, Inc. that the risk characterization conclusions are not supported by the data. Therefore, this finding is classified as a REC.

SUMMARY OF FINDINGS

DISCUSSION OF RECOGNIZED ENVIRONMENTAL CONDITIONS AND OTHER FINDINGS	
Finding 4 **Map Key 4** ☐ REC ☐ HREC ☐ CREC ☐ De minimis condition ☑ Other	Historical dry-cleaning operation on nearby property. According to the EDR report, a dry-cleaner operated at 12 Pleasant Street from approximately 1996 through 2002. The Dooley's Cleaners operation appears to have been located on the property now identified as 446 Main Street. In 2001, ENSR submitted a Class B-1 RAO to MassDEP documenting site closure for a release of arsenic to soil (RTN 2-13636). Although the site plan identifies a "Former Dry Cleaner" on the property, there does not appear to have been any evaluation of presence/absence of chlorinated VOCs in environmental media. Given that the subject property is located within approximately 150 feet downgradient from the former Dooley's Cleaners facility, undocumented releases of chlorinated VOCs to environmental media have the potential to affect conditions of the subject property. This finding constitutes an "other environmental concern" with respect to the subject property.
Finding 5 **Map Key 5** ☑ REC ☐ HREC ☐ CREC ☐ De minimis condition ☐ Other	Historical industrial operations on the subject property. Prior to use as a department store, the western portion of the subject property (Parcel 2) was used for a boot and shoe manufacturing operation for an unknown period. This finding constitutes a REC with respect to the subject property, as undocumented releases of OHM are a significant possibility in association with industrial operations predating modern environmental practices.
Finding 6 **Map Key 6** ☐ REC ☐ HREC ☐ CREC ☐ De minimis condition ☑ Other	Historical plating and printing operations on adjacent upgradient properties. Historical plating operations apparently took place on the fourth floor of an industrial building at the west end of Barton Place, upgradient from Parcel 2 and approximately co-located with the existing Worcester Plaza parking garage. Printing operations took place on the third floor of the Clark-Sawyer building which abuts Parcel 1 to the north. These operations likely included the use or storage of OHM. However, because the only identified source of information about these businesses is the historical Sanborn Maps, and there is not corroborating information about chemical use, storage, or historical releases, historical plating and printing operations on an adjacent upgradient properties are considered an "other environmental concern".
Finding 7 **Map Key 7** ☐ REC ☐ HREC ☐ CREC ☐ De minimis condition ☑ Other	Historical business operations. Historical city directories indicate that a photography studio operated on Parcel 1 during the 1960s and 1970s. This operation may have included the use or storage of OHM. However, because the only identified source of information about this business is the City Directories, and there is not corroborating information about chemical use, storage, or historical releases, the historical business operations at the subject site are considered an "other environmental concern".

SUMMARY OF FINDINGS

DISCUSSION OF RECOGNIZED ENVIRONMENTAL CONDITIONS AND OTHER FINDINGS	
Finding 8 **Map Key 8** ☑ REC ☐ HREC ☐ CREC ☐ De minimis condition ☐ Other	Historical underground petroleum storage with no closure documentation. According to records provided by the Trust, a fuel oil UST that historically served the Denholm Building was removed from the property in 2012 by Petroleum Management Services. The size of the UST is unknown. Waste generated during UST closure included 4,090 gallons of virgin No. 4 fuel oil and 960 gallons of oily water. No UST Closure Report of other documentation of environmental conditions following removal of the UST has been provided to Wilcox & Barton, Inc. The 1969 deed for the property also references gasoline dispensing equipment on the subject property. Historical underground storage of petroleum with no closure documentation constitutes a REC with respect to the subject property.
Finding 9 **Map Key 9** ☑ REC ☐ HREC ☐ CREC ☐ De minimis condition ☐ Other	Oil staining around drums stored on Parcel 2. An area of oil staining was observed around the drum of chassis oil and unlabeled drums near the boiler room on Parcel 2. According to Fire Department records, on April 1996, MassDEP issued a NON to Meredith & Grew at 484 Main Street for hazardous waste and air quality violations. The MassDEP inspection report notes the presence of oil-filled 5-gallon buckets placed under and near the boilers; this is consistent with observations during this assessment. Given the apparent multi-decade history of leaks from the boilers on Parcel 2, this finding is considered a REC.
Finding 10 **Map Key 10** ☐ REC ☐ HREC ☐ CREC ☐ De minimis condition ☑ Other	Anthropogenic fill and smokestack bottom ash. Several piles of granular material mixed with construction debris including tile, brick, metal pipe and concrete fragments were observed on the basement on Parcel 1, and a roughly 10 cubic yard pile of granular fill was observed at the south end of Parcel 3. The smokestack on Parcel 2 was likely constructed in the late 1800s to serve the coal-fired Walker & Brown Boot & Shoe Factory. Although the duration and time of use of the smokestack is unknown, it presumably has some (potentially large) volume of bottom ash accumulated at the base of the structure. The presence of anthropogenic fill and bottom ash on the subject property is considered an "other environmental concern," as special handling of these materials may be required during redevelopment.
Finding 11 **Map Key 11** ☑ REC ☐ HREC ☐ CREC ☐ De minimis condition ☐ Other	Staining near basement floor drain. One floor drain was observed in the basement of Parcel 1. Apparent oil staining was observed on the floor around this drain. Because the discharge location of the floor drain is unknown and could be a pathway to the subsurface, this finding is considered a REC with respect to the subject property.

SUMMARY OF FINDINGS

DISCUSSION OF RECOGNIZED ENVIRONMENTAL CONDITIONS AND OTHER FINDINGS	
Finding 12 **Map Key 12** ☑ REC ☐ HREC ☐ CREC ☐ De minimis condition ☐ Other	Apparent hydraulic oil-impacted sump. An apparent hydrocarbon sheen was observed in a sump adjacent to the central elevator shaft on Parcel 1, and a trash bag full of oil-soaked pads was staged on a concrete abutment adjacent to the sump. According to the property manager, the central elevator was taken out of service, and the hydraulic oil was pumped into the two 55-gallon drums staged near the elevator. The proximity of the oil-soaked pads to the elevator and an apparent oil-impacted sump constitutes a REC.
Finding 13 **Map Key 13** ☑ REC ☐ HREC ☐ CREC ☐ De minimis condition ☐ Other	Potential subsurface discharge of boiler blow-down. According to the 1996 NON issued to Meredith & Grew by MassDEP, treatment chemicals are added to the boilers, and boiler blow down, which may contain high concentrations of metals, is discharged to the municipal sewer system. Given that a failed sewer connection was identified in 2017, and it is unclear how long the failed line existed before it was identified and when/if it was repaired, it is possible that boiler blowdown has been discharged directly to the subsurface under the Denholm Building. This finding is considered a REC.
Finding 14 **Map Key 14** ☐ REC ☐ HREC ☐ CREC ☐ De minimis condition ☑ Other	PCB oil on the subject property. Two transformers, both labeled "Askarel Filled Transformer," were observed in the electrical rooms on Parcels 1 and 2. Askarel is a trade name for PCB oil. No staining was observed in the vicinity of the transformers. Several other pieces of electromechanical equipment such as pumps, generators, and compressors were observed in the basement. Given the age of this equipment, it is possible it they contain PCB oil. Because special handling of equipment containing PCB oil will be required during redevelopment, this finding is considered an "other environmental concern" with respect to the subject property.
Finding 15 **Map Key 15** ☐ REC ☐ HREC ☐ CREC ☐ De minimis condition ☑ Other	Underground storage of electrical equipment/long-term operation of electrical substation on the subject property. According to the property manager, a vault containing electrical equipment owned by National Grid is under the landing at the top of the stairs on the basement level of Parcel 2. The presence of this vault is consistent with the 1936 and 1950 Sanborn maps, which identify an electrical substation on Parcel 2. Given the unknown contents and construction of the vault, there is a potential for leaks of cable oil and/or MODF into the vault, and potential for tracking of oil potentially containing PCBs in and around the vault. Because responsibility for clean-up, if warranted, would be the responsibility of the electric company, this finding is considered an "other environmental concern".

NON-SCOPE CONSIDERATIONS	
Asbestos	Not evaluated. ACM is presumed to be present in the Denholm Building. If building demolition or renovation are planned, a hazardous materials survey should be performed.
Radon	High radon potential (greater than 4 picocuries/liter). If development plans include construction of basements, mitigation for radon will be warranted. *Source*: US Environmental Protection Agency

SUMMARY OF FINDINGS

NON-SCOPE CONSIDERATIONS	
Lead-based Paint	Not evaluated. If building demolition or renovation are planned, a hazardous materials survey should be performed.
Wetlands	Not evaluated.
Regulatory Compliance	Not evaluated.
Endangered Species	Not evaluated.
Indoor Air Quality	Not evaluated.
Mold	Not evaluated.
Emerging Contaminants	A review of relevant state databases did not reveal concerns with respect to emerging contaminants such as per- and polyfluoroalkyl substances.

DATA GAPS	
Gap	**Impact**
	No significant data gaps were encountered during this assessment.

QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

Wilcox & Barton INC.
CIVIL • ENVIRONMENTAL • GEOTECHNICAL

Environmental Professionals

The following Wilcox & Barton, Inc. personnel are qualified as Environmental Professionals in accordance with 40 CFR 312 through a qualifying combination of licensure, education, and experience. These individuals have been authorized by executive management to perform All Appropriate Inquiry investigations in compliance with the standard and with corporate quality requirements.

William R. Wilcox, Jr., Co-Founder, President - Principal Geologist

As co-founder and President of the firm, Bill's sole focus is on solving our clients' environmental, geotechnical, and engineering challenges through the delivery of value. He is dedicated to responsiveness, quality, optimal use of client resources, and being accessible at all times. Over the course of 25 years as a hands-on business leader, Bill has managed and directed hundreds of environmental assessment, investigation, remediation, and compliance projects. He holds a degree in Natural Science from Castleton State College.

Russell W. Barton, Co-Founder, Senior Vice President - Principal Geologist

Russ manages company resources and oversees day-to-day operations to ensure client needs and objectives are met. Russ is the face of the business in the areas of oil services and petroleum cleanup. He has almost 25 years' experience in the environmental consulting industry, maintaining expertise in site assessment; investigation and remediation of hazardous materials, both indoors and in the ground; underground storage tank design, installation, and management; and environmental construction. He is a trusted ally and is often called upon to solve difficult regulatory and technical problems for his diverse clientele. Russ received his Bachelor of Arts degree in Natural Science from Castleton State College.

Robert W. Rooks, PE, Senior Vice President - Principal Engineer

Bob oversees the technical execution of all work to ensure accuracy and defensibility, bringing his ruthless focus on quality to all the firm's work product. He has a diverse engineering background, spanning 28 years, and maintains expertise in all of the company's service areas. Bob leads our technical workforce of engineers, geologists, and scientists in the execution of excellent work to meet client and regulatory expectations. He holds bachelor's and master's degrees in Civil and Environmental Engineering from Duke University and is a licensed Professional Engineer in all New England states plus New York, Florida, and Hawaii.

David JP Foss, CPG, LSP, Senior VP- Manager, MA, CT, NY Environmental

David leads our consulting practice in Massachusetts, directing multi-discipline scientific teams in the delivery of high-value consulting advise and work product. A skilled communicator, he knows the importance of seamless coordination and communication between subject-matter experts to successfully complete complex projects. David brings more than 25 years' experience to the area of Brownfields redevelopment, where he focuses on the productive reuse of regulated hazardous waste sites. He excels at seeing the "big picture," helping clients understand risks and liabilities, and maximizing value during Brownfields redevelopment projects. David is an active member of the LSPA Regulations Committee and has strong working relationships with regulators throughout New England. David is a Certified Professional Geologist and Licensed Site Professional in Massachusetts. He holds a bachelor's degree in Geology from Colgate University and a master's degree in Geology and Geophysics from the University of Hawaii at Manoa.

Wilcox & Barton INC.
CIVIL • ENVIRONMENTAL • GEOTECHNICAL

Environmental Professionals

Amy A. Roth, PG, LSP, Associate Vice President

Amy is a successful Project Manager with expertise in numerous facets of the environmental industry earned over more than 20 years. She directs and manages projects, multidisciplinary scientific teams, and specialty contractors at project sites throughout New England, consistently developing and implementing creative solutions for complex environmental problems. Amy drives project schedules and budgets with passion. She is accessible and responsive and resolves environmental matters with clients' objectives foremost in mind. Amy specializes in property transactions, redevelopment, indoor air, and the investigation and remediation of oil and hazardous materials subject to MGL Chapter 21 E and the Massachusetts Contingency Plan. She is an active member of the Licensed Site Professional Association and works regularly with industry leaders and regulators. She received her master's degree in Geology/Geochemistry from Washington University in St. Louis.

John DeMille, Senior Project Geologist

John serves our clients as a hands-on Project Manager. He streamlines projects, manages with precision, and saves clients' money through his meticulous attention to detail. He has a precise and comprehensive understanding of state and federal regulations, allowing him to design cost-effective investigatory and remedial work scopes. John specializes in due diligence assessments, including Phase I and Phase II Environmental Site Assessments, building-related hazardous materials surveys, and geotechnical evaluations to drive important business decisions associated with property acquisition. He received his Bachelor of Science degree in Geology from Bridgewater State University.

Paul Plagge, EIT, Senior Engineer

Paul is a Senior Project Manager, technical lead for all Wilcox & Barton, Inc. hazardous materials projects, and trusted advisor for the company's environmental and civil work. With more than 25 years' experience, Paul has completed massive multimillion dollar projects with multi-disciplined design teams from Florida to Maine. He is a licensed Asbestos Inspector and Project Designer in seven states. He has guided and executed ASTM Phase I and Phase II Environmental Site Assessments in support of real estate transactions as well as preliminary and comprehensive response actions pursuant to the *Massachusetts Contingency Plan*. Paul has designed and supervised the installation of remediation systems, sewer connection/extensions, storm water conveyance systems, Title V septic systems, floor drains and oil/water separators, and the installation and removal of underground storage tank and aboveground storage tank systems. He received a Bachelor of Science degree in Civil Engineering from the University of Massachusetts Amherst.

Barrett L Smith, CPG, LEP – Senior Hydrogeologist

Barrett is a seasoned Project Manager with over 20 years of consulting experience. Clients praise him for clearly identifying risks, providing high value solutions and navigating complicated regulatory frameworks with ease. He excels at evaluating and supporting redevelopment of sites with long and complex histories. Because of his affable personality and excellent communication skills, he works well with clients, team members, regulators and other stake holders to successfully complete projects. Barrett is a Certified Professional Geologist and a Licensed Environmental Professional in Connecticut. He received his Bachelor of Arts degree in Geology-Biology from Colby College and his master's degree in Geology from the University of Maryland.

Wilcox & Barton INC.
CIVIL • ENVIRONMENTAL • GEOTECHNICAL

Environmental Professionals

Alan J. McLevy, PE, CPESC, Senior Engineer

As a technical leader, client manager, and Professional Engineer in Massachusetts, New Hampshire, and Connecticut, Alan is a senior member of the technical team and is responsible for technical, budgetary, and schedule management of many of the firm's more complex projects, including spill prevention planning, construction monitoring, and compliance with petroleum storage and fire protection requirements. With more than 15 years' experience, Alan also leads technical teams in the execution of site assessments, remedial design, and risk-based site closure, guiding clients through the intricacies of varying and ever-changing state and federal environmental regulations. As a Certified Professional in Erosion and Sediment Control (CPESC), Alan leads our stormwater monitoring and permitting practice at construction and development projects throughout New England. He holds a bachelor's degree in Environmental Engineering from Roger Williams University.

Chris Montoya, Project Geologist

As a technical leader, Chris Montoya is a Project Geologist responsible for the performance of Phase I Environmental Site Assessments, subsurface investigations, hazardous materials inspections, soil excavation oversight, sub-slab depressurization system design and operation, underground storage tank closure, soil and groundwater remediation, data analysis, and report writing. Chris has a genial personality and has been known to do whatever it takes to finish a project, including working nights and weekends to get the job done. He is a Licensed Asbestos Inspector. He earned his BS in Earth Sciences and graduated Magna Cum Laude from Bridgewater State University.

Brian P. Campelia, PE, Senior Engineer

As a technical leader, client manager, and Professional Engineer in New Hampshire, Brian is responsible for technical, budgetary, and schedule management of projects including subsurface investigations and soil and groundwater remediation. He holds a master's degree in Environmental Engineering from the University of New Hampshire.

Patrick J. Massicotte, PE, Senior Engineer

Patrick is a Senior Project Manager responsible for the technical, budgetary, and scheduling aspects of numerous environmental investigation and remediation projects. He is very familiar with New Hampshire and Massachusetts environmental regulations and the New Hampshire Petroleum Reimbursement Fund Program. Patrick embraces a challenge and enjoys leading clients through the various environmental requirements to reach compliance goals and solutions. Patrick holds a bachelor's degree in Civil Engineering from the University of New Hampshire and is a registered Professional Engineer in New Hampshire.

ATTACHMENT B

SCOPE OF WORK

SCOPE OF WORK

1.0 INTRODUCTION

This report presents findings and potential environmental conditions associated with the referenced parcel. This Phase I Environmental Site Assessment (Phase I ESA) was completed in accordance with the American Society for Testing and Materials (ASTM) Standard E 1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, as approved November 1, 2013, by ASTM Committee E-50. This standard was originally approved in 1993, revised in 2005 as E1527-05, revised again in 2013 as E1527-13, and again in 2021 in its current form. The methodology meets the standard for "all appropriate inquiry" necessary to invoke landowner liability protections afforded under the Comprehensive Environmental Response Compensation and Liabilities Act, as amended by the Superfund Amendments and Reauthorization Act of 1986, and the Small Business Liability Relief and Brownfields Revitalization Act of 2002.

1.1 Purpose

The purpose of the Phase I ESA was:

1. To identify and evaluate the actual and potential environmental risks associated with the site; and
2. To evidence that the User has made "all appropriate inquiry" regarding environmental conditions at the site.

The objective of the Phase I ESA is to identify recognized environmental conditions (RECs). The term *recognized environmental condition* means the presence or likely presence of any hazardous substance or petroleum products in, on, or at a property:

1. Due to any release to the environment;
2. Under conditions indicative of a release to the environment; or
3. Under conditions that pose a material threat of a future release to the environment.

An *historical recognized environmental condition* (HREC) is defined as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and that has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria…without subjecting the property to any required controls.

A *controlled recognized environmental condition* (CREC) is a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

RECs can include the presence of such materials even under conditions that comply with applicable laws and regulations. *De minimis* conditions are not RECs.

Some conditions present a potential environmental concern, but do not meet the definition of REC as provided in the ASTM Standard. These conditions are reported herein as "other environmental concerns" so that they come to the attention of the User. Further investigation or

evaluation is left to the discretion of the User based on the available information and risk tolerance.

This assessment is intended for the use of the User and its assigns for the purposes defined in this section.

1.2 Scope of Services

The scope of services includes the completion of a Phase I ESA in accordance with ASTM Standard E 1527-21.

1.3 Significant Assumptions

This assessment was completed under the assumption that the property will be redeveloped for the anticipated use indicated. Wilcox & Barton, Inc. has assumed historical records and documents to be factual and accurate regarding historical information and conditions that were present at the time those documents were created.

1.4 Limiting Conditions, Deviations, and Exceptions

This site assessment is based on the conditions existing at the property during the site visit. Past conditions are considered on the basis of readily available records, previous reports, interviews, and recollections. Site conditions are subject to variations and changes over time.

This report is based on current, fully-implemented, environmental regulations. Future regulatory modifications and agency interpretations may affect the environmental status of the property. The assessment has been completed without substantial deviations or exceptions from the protocols specified in ASTM Standard E 1527-21.

This Phase I ESA is limited in scope to the activities, methods, and levels of diligence prescribed by the ASTM Standard. While the findings documented herein are based upon the best professional judgment of appropriately qualified and experienced environmental professionals, no environmental site assessment can wholly eliminate uncertainty regarding the potential for RECs.

Wilcox & Barton, Inc. has made reasonable attempts to collect and validate the information presented in this report. Further, we have presumed the information to be valid and accurate unless conflicting sources were identified. Where information upon which we have relied is shown to be invalid, inaccurate, or incomplete, our conclusions and recommendations may not be valid. Wilcox & Barton, Inc. reserves the right to modify its conclusions upon receipt of notice regarding new or previously inaccurate information.

1.5 Special Terms and Conditions

Special terms or conditions different from the protocols of ASTM E 1527-21 were not requested, except as indicated.

1.6 User Reliance

This report has been prepared by Wilcox & Barton, Inc. for the use and benefit of, and may be relied upon by the User and its lenders, affiliates, subsidiaries, and assigns.

This report may not be relied upon by any other person or entity, either in part or in its entirety, without prior written authorization of Wilcox & Barton, Inc. In accordance with Section 4.6 of the ASTM Standard of Practice, this environmental assessment may be presumed valid for a period of up to 180 days from the date of the first completed activity, which can be taken as receipt of the database reports.

2.0 USER PROVIDED INFORMATION

2.1 Recorded Land Title Records

Ownership information was obtained from available records at the local assessor, listor, or tax clerk office.

A title search was not performed as part of this assessment.

2.2 Valuation Reduction for Environmental Issues

Based on information known to Wilcox & Barton, Inc. and information found in the public record, there are no known environmental liens, encumbrances, or other environmentally-based restrictions on use of the property. Neither the User nor Wilcox & Barton, Inc. has any specific knowledge of any valuation reductions, either in the past or in the future, on the basis of environmental issues.

2.3 Reason for Performing Phase I Assessment

This assessment has been prepared to provide information regarding potential environmental conditions at the property in support of a potential real estate transaction.

2.4 Commonly-Known or Reasonably Ascertainable Information

No additional information was provided by the User.

3.0 RECORDS REVIEW

3.1 Standard Environmental Records

Wilcox & Barton, Inc. contracted Environmental Data Resources, Inc. (EDR) to conduct an environmental database search for the subject property and surrounding areas in accordance with ASTM E 1527-21. A copy of the Radius Report generated by EDR is provided in Attachment D.

3.2 Additional Record Sources

Wilcox & Barton, Inc. also reviewed files on applicable state database, files at the relevant municipal offices, historical fire insurance maps, and historical aerial photographs for the subject and adjacent properties. The information provided by these sources was considered in the summary of findings for the site.

3.3 Historical Use Information on the Property

Historical aerial photographs and documents were reviewed to determine historical uses of the subject property. The historical documents, where available, are included in Attachment D.

3.4 Historical Use of Adjoining Properties

Information regarding the historical use of adjoining properties is based upon review of the EDR report, historical aerials photographs, and other historical documents. In general, adjoining properties have historically been a mixture of commercial/industrial, agricultural, and residential properties.

4.0 SITE RECONNAISSANCE

Photographs documenting the site inspection are presented in Attachment E and convey the general condition of the property and abutters at the time of inspection.

4.1 Limiting Conditions and Methodologies Used

Wilcox & Barton, Inc. performed the site reconnaissance in accordance with ASTM Standard E 1527-21. During the reconnaissance, Wilcox & Barton, Inc. personnel physically walked accessible portions of the subject property and along the property boundaries.

The objective of the methodology employed for this assessment was to minimize, to the extent reasonably possible, the potential for later discovery of environmental conditions not described herein. While Wilcox & Barton, Inc. believes this objective has been achieved, no site assessment can wholly eliminate uncertainty regarding the potential for environmental conditions, and no guarantees, either expressed or implied, are intended by the preparation of this report.

5.0 INTERVIEWS

Wilcox & Barton, Inc. contacted the sources indicated. Information gathered from each of the sources is incorporated throughout the Summary of Findings.

6.0 EVALUATION

Recognized Environmental Conditions, Historical Environmental Conditions, Controlled Environmental Conditions, and De minimis Conditions are listed in the Summary of Findings.

Any potential sources of contamination, or other conditions meeting the ASTM definition, are considered RECs and may imply future consulting and/or legal costs for the owner of the subject parcel if a release is later detected.

6.1 Non-Scope Considerations

Factors outside the scope of the ASTM standard of practice can have a material environmental impact on the current or planned use of a property. Readily-available information for common non-scope items is presented in the Summary of Findings. However, comprehensive surveys and evaluations for non-scope considerations were not performed unless specifically requested.

6.2 Opinion

The opinions expressed in this report are based on information provided by visual inspections of the subject property, interviews with public officials, and reviews of documents available in public agency files. The information provided or obtained in these ways was accepted as-is and not independently verified, unless there were reasons to question its validity. Should any additional information become available of a relevant public health or environmental nature, Wilcox & Barton, Inc. would request access to it and the opportunity to comment on it, reserving the right to reevaluate and amend any opinions made in this report.

6.3 Data Gaps

Data gaps, and the expected effects on the findings presented herein, are presented in the Summary of Findings.

6.4 References and Information Sources

References and information sources used during this study are listed in the Summary of Findings.

ATTACHMENT C

USER QUESTIONNAIRE

ASTM E 1527-13 User Questionnaire

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfield Revitalization Act of 2001, the user must provide the following information to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

Property: 484 Main Street
Worcester, Massachusetts
MBL: 03-20C-U-420

1. Environmental cleanup liens filed or recorded against the site (40 CFR 312.25).
Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law? No

2. Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).
Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? No

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).
As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? No

4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).
Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? YES / NA

5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30)

Are you aware of commonly known or reasonable ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

(a.) Do you know of past uses of the property? YES. OFFICE AND DEPARTMENT STORE

(b.) Do you know of specific chemicals that are present or once were present at the property? NA

(c.) Do you know of any spills or other chemical releases that have taken place at the property? YES

(d.) Do you know of any environmental cleanups that have taken place at the property? YES

6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property? NO SOIL CONTAMINATION KNOWN, BUT WE ARE AWARE OF HAZARDOUS BUILDING MATERIALS AS A SURVEY WAS CONDUCTED BY AN LSP.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2022 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/20/2022 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 06/20/2022 has revealed that there is 1

RCRA-TSDF site within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/20/2022 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

CVS PHARMACY 0127 EPA ID:: MAC300018918	110 FRONT ST	ESE 1/8 - 1/4 (0.240 mi.)	AE122	742

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/20/2022 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/20/2022 has revealed that there are 19 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Federal institutional controls / engineering controls registries

US INST CONTROLS: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use

restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROLS list, as provided by EDR, and dated 02/21/2022 has revealed that there is 1 US INST CONTROLS site within approximately 0.5 miles of the target property.

Lists of state- and tribal hazardous waste facilities

MA SHWS: Contains information on releases of oil and hazardous materials that have been reported to DEP.

A review of the MA SHWS list, as provided by EDR, and dated 05/26/2022 has revealed that there are 285 MA SHWS sites within approximately 1 mile of the target property.

Lists of state and tribal registered storage tanks

MA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Protection's Summary Listing of all the Tanks Registered in the State of Massachusetts.

A review of the MA UST list, as provided by EDR, and dated 05/05/2022 has revealed that there are 7 MA UST sites within approximately 0.25 miles of the target property.

Lists of state and tribal brownfield sites

MA BROWNFIELDS: Under Massachusetts law, M.G.L. c. 21E is the statute that governs the cleanup of releases of oil and/or hazardous material to the environment. The Brownfields Act of 1998 amended M.G.L. c. 21E by establishing significant liability relief and financial incentives to spur the redevelopment of brownfields, while ensuring that the Commonwealth's environmental standards are met. Most brownfields are redeveloped with the benefit of liability protections that operate automatically under M.G.L. c. 21E.

A review of the MA BROWNFIELDS list, as provided by EDR, has revealed that there are 12 MA BROWNFIELDS sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 02/23/2022 has revealed that there are 11 US BROWNFIELDS sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/20/2022 has revealed that

there are 17 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
COMMONWEALTH GAS CO	25-30 QUINSIGAMOND A	S 1/2 - 1 (0.691 mi.)	BS278	2058

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

CHANDLER STREET GAS	30 CHANDLER ST	SW 0 - 1/8 (0.084 mi.)	H42	221

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and

operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 5 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Grant Type:	BCRLF
Property Number:	03-013-00006
Parcel size:	0.92
Latitude:	42.2611823
Longitude:	-71.8021885
HCM Label:	-
Map Scale:	-
Point of Reference:	-
Highlights:	Future use is a mix between institutional (community college) and commercial. Former Use: Since the early twentieth century, the Worcester Telegram & Gazette (T&G) newspaper operations have been located at 18-20 Franklin Street and 30 Federal Street (Parcel MBL03-013-00006). Up until 2008, all aspects of the daily newspaper production, including printing, type-setting, and paper distribution, were performed within their downtown facility. The relocation of the paper s printing facilities to a suburb of Worcester, the heavy reliance on the Internet for free news and information, the high overhead cost for publishing a daily newspaper and languishing advertising revenues have caused a dramatic decrease in the size of the paper and its staff. As of August, 2012, the T&G has consolidated its operations and relocated its offices within Downtown Worcester, leaving the former T&G building vacant. On November 9, 2011, NGP, Inc. purchased the T&G properties from the New York Times Company, owners of the T&G. The proposed redevelopment of 18-20 Franklin Street would allow for the remediation, renovation, and rehabilitation of an existing, underutilized building. Placing the building back into active use would reenergize the area around City Hall, the Worcester Common, and the newly renovated Hanover Theater for the Performing Arts.

Property Description:	Since the early twentieth century, the Worcester Telegram & Gazette (T&G) newspaper operations have been located at 18-20 Franklin Street and 30 Federal Street (Parcel MBL03-013-00006). Up until 2008, all aspects of the daily newspaper production, including printing, type-setting, and paper distribution, were performed within their downtown facility. The relocation of the paper s printing facilities to a suburb of Worcester, the heavy reliance on the Internet for free news and information, the high overhead cost for publishing a daily newspaper and languishing advertising revenues have caused a dramatic decrease in the size of the paper and its staff. As of August, 2012, the T&G has consolidated its operations and relocated its offices within Downtown Worcester, leaving the former T&G building vacant. On

20 FRANKLIN STREET (Continued) **1016139213**

November 9, 2011, NGP, Inc. purchased the T&G properties from the New York Times Company, owners of the T&G. The proposed redevelopment of 18-20 Franklin Street would allow for the remediation, renovation, and rehabilitation of an existing, underutilized building. Placing the building back into active use would reenergize the area around City Hall, the Worcester Common, and the newly renovated Hanover Theater for the Performing Arts.

Highlights:	Future use is a mix between institutional (community college) and commercial. Former Use: Since the early twentieth century, the Worcester Telegram & Gazette (T&G) newspaper operations have been located at 18-20 Franklin Street and 30 Federal Street (Parcel MBL03-013-00006). Up until 2008, all aspects of the daily newspaper production, including printing, type-setting, and paper distribution, were performed within their downtown facility. The relocation of the paper s printing facilities to a suburb of Worcester, the heavy reliance on the Internet for free news and information, the high overhead cost for publishing a daily newspaper and languishing advertising revenues have caused a dramatic decrease in the size of the paper and its staff. As of August, 2012, the T&G has consolidated

20 FRANKLIN STREET (Continued) **1016139213**

its operations and relocated its offices within Downtown Worcester, leaving the former T&G building vacant. On November 9, 2011, NGP, Inc. purchased the T&G properties from the New York Times Company, owners of the T&G. The proposed redevelopment of 18-20 Franklin Street would allow for the remediation, renovation, and rehabilitation of an existing, underutilized building. Placing the building back into active use would reenergize the area around City Hall, the Worcester Common, and the newly renovated Hanover Theater for the Performing Arts.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
AIR EMISSIONS CLASSIFICATION UNKNOWN
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
MA-EPICS - Massachussetts Environmental Protection Integrated Computer System

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Automatic line leak detect: Not reported
Tank corrosion type: Not reported
Leak corrosion type: Not reported

Tank ID: 6
Tank Status: **In Use**
Status Date: Not reported
Date Installed: 04/01/1997
Capacity: 6000.00000
Contents: Gasoline
Tank Usage: Motor Vehi
Tank Leak Detection: Continuous Interstitial Monitoring
Pipe Leak Detection: Annual Automatic Line Leak Detection Test
Latitude: 42.26003
Longitude: -71.80626
Tank construct: Double-walled non-corrodible (including "composite") material (cathodic protection not required)
Pipe construct: Double-walled non-corrodible material (No corrosion protection required)
Ptype: Pressurized piping system with mechanical automatic line leak detection
Number of compartment: 2
Pipe install date: 04/01/1997
Pipe leak install date: Not reported
Submersible sump: Y
Submersible sump install date: Not reported

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
AIR EMISSIONS CLASSIFICATION UNKNOWN
AIR MINOR

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

SHWS:

Name:	CITYSQUARE HISTORIC FILL
Address:	100 FRONT STREET
City,State,Zip:	WORCESTER, MA 016081425
Facility ID:	2-0018341
Source Type:	UNKNOWN
Release Town:	WORCESTER
Notification Date:	09/09/2011

MECHANICS PLAZA (Continued) **S107847152**

Category:	120 DY
Associated ID:	Not reported
Current Status:	RAO
Status Date:	10/08/2011
Phase:	Not reported
Response Action Outcome:	A2
Oil Or Haz Material:	Oil

Release:

Name:	CITYSQUARE HISTORIC FILL
Address:	100 FRONT STREET
City,State,Zip:	WORCESTER, MA 016081425
Release Tracking Number/Current Status:	2-0018341 / RAO
Primary ID:	Not reported
Official City:	WORCESTER
Notification:	09/09/2011
Category:	120 DY
Status Date:	10/08/2011
Phase:	Not reported
Response Action Outcome:	A2 - A permanent solution has been achieved. Contamination has not been reduced to background.
Oil / Haz Material Type:	Oil

Actions:

Action Type:	A Notice sent to a Potentially Responsible Party (PRP)
Action Status:	A MassDEP piece of correspondence was issued (approvals, NORs, etc.
Action Date:	10/11/2011
Response Action Outcome:	A permanent solution has been achieved. Contamination has not been reduced to background.

Action Type:	Release Abatement Measure
Action Status:	Level I - Technical Screen Audit
Action Date:	10/5/2011
Response Action Outcome:	A permanent solution has been achieved. Contamination has not been reduced to background.

Action Type:	Release Abatement Measure
Action Status:	Completion Statement Received
Action Date:	10/8/2011
Response Action Outcome:	A permanent solution has been achieved. Contamination has not been reduced to background.

Action Type:	BOL
Action Status:	SHPFAC
Action Date:	10/8/2011
Response Action Outcome:	A permanent solution has been achieved. Contamination has not been reduced to background.

Action Type:	Response Action Outcome - RAO
Action Status:	RAO Statement Received
Action Date:	10/8/2011
Response Action Outcome:	A permanent solution has been achieved. Contamination has not been reduced to background.

MECHANICS PLAZA (Continued) **S107847152**

Action Type: Response Action Outcome - RAO
Action Status: Level I - Technical Screen Audit
Action Date: 11/23/2011
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background.

Action Type: RNFE
Action Status: Transmittal, Notice, or Notification Received
Action Date: 9/19/2011
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background.

Action Type: Release Abatement Measure
Action Status: Written Plan Received
Action Date: 9/21/2011
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background.

Action Type: Release Abatement Measure
Action Status: Fee Received - FMCRA Use Only
Action Date: 9/22/2011
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background.

Action Type: BOL
Action Status: Transmittal, Notice, or Notification Received
Action Date: 9/28/2011
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background.

Action Type: Release Disposition
Action Status: Reportable Release under MGL 21E
Action Date: 9/9/2011
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background.

Chemicals:
Chemical: C9 THRU C18 ALIPHATIC HYDROCARBONS
Quantity: 3470 milligrams per kilogram
Location Type: COMMERCIAL

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
MA-EPICS - Massachussetts Environmental Protection Integrated Computer System

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Release:
Name: NE TELEPHONE CO
Address: 15 CHESTNUT ST
City,State,Zip: WORCESTER, MA 01600
Release Tracking Number/Current Status: 2-0000400 / RAO
Primary ID: Not reported
Official City: WORCESTER
Notification: 01/15/1989
Category: NONE
Status Date: 07/20/1995
Phase: Not reported
Response Action Outcome: A2 - A permanent solution has been achieved. Contamination has not been reduced to background.
Oil / Haz Material Type: Not reported

Click here to access the MA DEP site for this facility:

Actions:
Action Type: Release Disposition
Action Status: Valid Transition Site
Action Date: 1/15/1989
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background.

Action Type: Response Action Outcome - RAO

VERIZON MASSACHUSETTS #861906 (Continued) **1000942669**

Action Status:	Level I - Technical Screen Audit
Action Date:	2/16/2005
Response Action Outcome:	A permanent solution has been achieved. Contamination has not been reduced to background.
Action Type:	Response Action Outcome - RAO
Action Status:	RAO Statement Received
Action Date:	7/20/1995
Response Action Outcome:	A permanent solution has been achieved. Contamination has not been reduced to background.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
MA-EPICS - Massachussetts Environmental Protection Integrated Computer System

Waste Description: SILVER

Waste Code: D016
Waste Description: 2,4-D (2,4-DICHLOROPHENOXYACETIC ACID)

Waste Code: D018
Waste Description: BENZENE

Waste Code: D024
Waste Description: M-CRESOL

Waste Code: D026
Waste Description: CRESOL

Waste Code: D027
Waste Description: 1,4-DICHLOROBENZENE

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: D039
Waste Description: TETRACHLOROETHYLENE

Waste Code: P001
Waste Description: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste Code: P012
Waste Description: ARSENIC OXIDE AS2O3 (OR) ARSENIC TRIOXIDE

Waste Code: P042
Waste Description: 1,2-BENZENEDIOL, 4-[1-HYDROXY-2-(METHYLAMINO)ETHYL]-, (R)- (OR) EPINEPHRINE

Waste Code: P075
Waste Description: NICOTINE, & SALTS (OR) PYRIDINE, 3-(1-METHYL-2-PYRROLIDINYL)-,(S)-, & SALTS

Waste Code: P081
Waste Description: 1,2,3-PROPANETRIOL, TRINITRATE (R) (OR) NITROGLYCERINE (R)

Waste Code: P188
Waste Description: BENZOIC ACID, 2-HYDROXY-, COMPD. WITH (3AS-CIS)-1,2,3,3A,8,8A-HEXAHYDRO-1,3A,8-TRIMETHYLPYRROLO[2,3-B]INDOL-5-YL METHYLCARBAMATE ESTER (1:1) (OR) PHYSOSTIGMINE SALICYLATE

Waste Code: U002
Waste Description: 2-PROPANONE (I) (OR) ACETONE (I)

Waste Code: U010
Waste Description: AZIRINO [2',3':3,4]PYRROLO[1,2-A]INDOLE-4,7-DIONE, 6-AMINO-8-[[(AMINOCARBONYL)OXY]METHYL]-1,1A,2,8,8A,8B-HEXAHYDRO-8A-METHOXY-5-METHYL-, [1AS-(1AALPHA, 8BETA, 8AALPHA, 8BALPHA)]- (OR) MITOMYCIN C

CVS PHARMACY 0127 (Continued) **1014953960**

Waste Code: U031
Waste Description: 1-BUTANOL (I) (OR) N-BUTYL ALCOHOL (I)

Waste Code: U034
Waste Description: ACETALDEHYDE, TRICHLORO- (OR) CHLORAL

Waste Code: U035
Waste Description: BENZENEBUTANOIC ACID, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) CHLORAMBUCIL

Waste Code: U044
Waste Description: CHLOROFORM (OR) METHANE, TRICHLORO-

Waste Code: U058
Waste Description: 2H-1,3,2-OXAZAPHOSPHORIN-2-AMINE, N,N-BIS(2-CHLOROETHYL)TETRAHYDRO-, 2-OXIDE (OR) CYCLOPHOSPHAMIDE

Waste Code: U059
Waste Description: 5,12-NAPHTHACENEDIONE, 8-ACETYL-10-[(3-AMINO-2,3,6-TRIDEOXY)-ALPHA-L-LYXO-HEXOPYRANOSYL)OXY]-7,8,9,10-TETRAHYDRO-6,8,11-TRIHYDROXY-1-METHOXY-, (8S-CIS)- (OR) DAUNOMYCIN

Waste Code: U070
Waste Description: BENZENE, 1,2-DICHLORO- (OR) O-DICHLOROBENZENE

Waste Code: U072
Waste Description: BENZENE, 1,4-DICHLORO- (OR) P-DICHLOROBENZENE

Waste Code: U089
Waste Description: DIETHYLSTILBESTEROL (OR) PHENOL, 4,4'-(1,2-DIETHYL-1,2-ETHENEDIYL)BIS, (E)-

Waste Code: U122
Waste Description: FORMALDEHYDE

Waste Code: U129
Waste Description: CYCLOHEXANE, 1,2,3,4,5,6-HEXACHLORO-, (1ALPHA, 2ALPHA, 3BETA, 4ALPHA, 5ALPHA, 6BETA)- (OR) LINDANE

Waste Code: U132
Waste Description: HEXACHLOROPHENE (OR) PHENOL, 2,2'-METHYLENEBIS[3,4,6-TRICHLORO-

Waste Code: U150
Waste Description: L-PHENYLALANINE, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) MELPHALAN

Waste Code: U151
Waste Description: MERCURY

Waste Code: U154
Waste Description: METHANOL (I) (OR) METHYL ALCOHOL (I)

Waste Code: U165
Waste Description: NAPHTHALENE

Waste Code: U188
Waste Description: PHENOL

Waste Description:	IGNITABLE WASTE
Waste Code:	F001
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F002
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS

EASTERN CHEMICAL SPECIALTIES (FORMER) (Continued) **1000402017**

CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F010
Waste Description: QUENCHING BATH RESIDUES FROM OIL BATHS FROM METAL HEAT TREATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Waste Code: F011
Waste Description: SPENT CYANIDE SOLUTIONS FROM SLAT BATH POT CLEANING FROM METAL HEAT TREATING OPERATIONS.

Waste Code: U002
Waste Description: 2-PROPANONE (I) (OR) ACETONE (I)

Waste Code: U044
Waste Description: CHLOROFORM (OR) METHANE, TRICHLORO-

Waste Code: U070
Waste Description: BENZENE, 1,2-DICHLORO- (OR) O-DICHLOROBENZENE

Waste Code: U072
Waste Description: BENZENE, 1,4-DICHLORO- (OR) P-DICHLOROBENZENE

Waste Code: U077
Waste Description: ETHANE, 1,2-DICHLORO- (OR) ETHYLENE DICHLORIDE

Waste Code: U080
Waste Description: METHANE, DICHLORO- (OR) METHYLENE CHLORIDE

Waste Code: U112
Waste Description: ACETIC ACID, ETHYL ESTER (I) (OR) ETHYL ACETATE (I)

Waste Code: U117
Waste Description: ETHANE, 1,1'-OXYBIS-(I) (OR) ETHYL ETHER (I)

Waste Code: U154
Waste Description: METHANOL (I) (OR) METHYL ALCOHOL (I)

Waste Code: U159
Waste Description: 2-BUTANONE (I,T) (OR) METHYL ETHYL KETONE (MEK) (I,T)

Waste Code: U161
Waste Description: 4-METHYL-2-PENTANONE (I) (OR) METHYL ISOBUTYL KETONE (I) (OR) PENTANOL, 4-METHYL-

EASTERN CHEMICAL SPECIALTIES (FORMER) (Continued) **1000402017**

Waste Code: U210
Waste Description: ETHENE, TETRACHLORO- (OR) TETRACHLOROETHYLENE

Waste Code: U211
Waste Description: CARBON TETRACHLORIDE (OR) METHANE, TETRACHLORO-

Waste Code: U213
Waste Description: FURAN, TETRAHYDRO-(I) (OR) TETRAHYDROFURAN (I)

Waste Code: U220
Waste Description: BENZENE, METHYL- (OR) TOLUENE

Waste Code: U226
Waste Description: ETHANE, 1,1,1-TRICHLORO- (OR) METHYL CHLOROFORM

Waste Code: U228
Waste Description: ETHENE, TRICHLORO- (OR) TRICHLOROETHYLENE

Waste Code: U239
Waste Description: BENZENE, DIMETHYL- (I,T) (OR) XYLENE (I)

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
