CITY OF WORCESTER, MASSACHUSETTS

Shrewsbury Street Sewer Rehabilitation Sewer Rehabilitation Project
Contract S24-1-ARPA
Bid No. 8180-W4

ADDENDUM NO. 6

To be considered as part of the contract drawings and specifications for the Shrewsbury Street Sewer Rehabilitation Sewer Rehabilitation Project, dated April 2024:

QUESTIONS

Q1. Specification Section 02428 – Cured-in-Place Pipe, Section 3.03 A & B reference the treatment of condensate/curing water in accordance with all local, state, and federal regulations. For this project, will the Owner/Engineer please confirm the treatment methods and discharge locations for this condensate/cure water?

A1. **The Contractor is responsible for identifying the applicable local, state, and federal regulations.**

Q2. As it relates to CIPP liner thickness design, will the Engineer provide soil modulus and soil density values (assumed or known)?

A2. **No soil information is available. The Contractor may refer to the Natural Resources Conservation Service's (NRCS) Web Soil Survey for available soil information.**

Q3. As it relates to CIPP liner thickness design, the current spec references ASTM F1216, but this doesn't address liner thickness. Will the Engineer please confirm the minimum installed CIPP liner thickness for the proposed diameters?

A3. **The thickness of the CIPP shall be designed according to ASTM F1216. In addition, according to Specification Section 02428 – Cured-in-Place Pipe, Section 1.05 D., "The Contractor shall design all cured-in-place structural liner assuming fully deteriorated pipe conditions and a groundwater height above the crown of the pipe equal to one-half (50%) of the distance between the ground surface and the invert of the sanitary sewer line to be rehabilitated…"**

Q4. Will the Owner confirm the only way for Bidders to determine manhole diameters for CIPP inversion is by the sizing provided in the manhole inspection reports including in addendum 2? Or can the Owner provide data from GIS system?

A4. **In addition to the information included in the Contract Documents, the Contractor may conduct field investigations to confirm manhole diameters.**

Q5. Will the Owner confirm the manhole diameters for structures scheduled for rehab (pay item 710)?

A5. **In addition to the information included in the Contract Documents, the Contractor may conduct field investigations to confirm manhole diameters.**

Q6. Will the Owner confirm the anticipated NTP date for this project?

A6. **See Addendum No. 1 dated May 3, 2024.**

Q7. Will the Owner confirm how inclement weather days (rainfall, ambient temperatures) that prohibit necessary CIPP installation procedures will be evaluated for additional contract time?

A7. **Refer to Contract Documents Form – 30, 39M Section 8.3 regarding extensions of time.**

Q8. Should Bidders utilize the prevailing wages listed with the State Prevailing Wage Rates document (page 122 of PDF) or the Davis Bacon wages included in the specification?

A8. **Refer to Contract Documents Form – 30, 39M Section 5 regarding wage rates. Where conflict between the Code of Federal Regulations and State Laws and Regulations exist, the more stringent requirement shall apply.**

Q9. Please clarify the air monitoring expectations for this project stated in Specification Section 02428 – Cured-in-Place Pipe, Section 2.01D. Is continuous monitoring (for example a PID calibrated for styrene and capable of < 2ppm) or lab analysis (references to Summa canisters, GC/MS) the required air monitoring method as the verbiage seems to conflict by mentioning both. We highly recommend the former as a practical means of air monitoring on a CIPP jobsite.

A9. **According to Specification Section 02428 – Cured-in-Place Pipe, Section 2.01D, "Air monitoring devices used for monitoring CIPP emissions shall be capable of measuring concentrations of TO-15 volatile organic compounds (VOCs) as defined by the US Environmental Protection Agency's (EPA) TO-15 list… Air monitoring devices shall be capable of continuously monitoring air quality…" The Contractor shall refer to the EPA's TO-15 list for a list of VOCs that are required to be monitored.**

Q10. What is the height or elevation that the sewer can be surcharged?

A10. **See Addendum No. 1 dated May 3, 2024 regarding surcharging the existing sewer.**

Q11. Could the pipeline size/type and flow data for the sidelines coming into the mainline on the following streets be provided so the bypass requirements can be assessed?

a. Granby Road
b. Adams Street
c. Putnam Lane
d. Marshall Street
e. East Worcester Street
f. Mulberry Street

A11**. A figure is attached as Attachment A showing the pipe sizes and type of the sewers from the surrounding streets, including the streets listed above.**

A flow meter was installed in manhole SS00319 on Putnam Lane on March 9, 2024. Available flow data (from 3/9/2024 to 5/20/2024) is attached as Attachment B. The flow data in excel format can be viewed via the following link - https://westonandsampson-my.sharepoint.com/:f:/g/personal/wongk_wseinc_com/Ei6CAi-ISkZGge8Cc29q2lEBWRBH_cILzNcSfaEnF4SsUQ?e=LVKRgm

---

Q12. Could the structural as-builts of the following sewer manholes be provided so the Bidders can determine how the mainline overflows are constructed?

a. SS07191
b. SS07502
c. SS07156
d. SS07168

A12. **As-built drawings are not available for the manholes listed above. See Addendum No. 1 dated May 3, 2024 for invert information and photos of the overflow pipes.**

Inspection video of sewer structure SS00262 can be viewed via the following link - https://westonandsampson-my.sharepoint.com/:f:/g/personal/wongk_wseinc_com/Ei6CAi-ISkZGge8Cc29q2lEBWRBH_cILzNcSfaEnF4SsUQ?e=LVKRgm

---

Q13. Could the conversion between the two (2) pipe and manhole numbering systems be provided?

A13. **Conversion tables are attached as Attachment C.**
