
LOCKS / DOORS / DOOR HARDWARE REPLACEMENT - WPS SPECIFICATIONS & REQUIREMENTS

The City of Worcester is soliciting bids on behalf of Worcester Public Schools (WPS) for a project involving the integration of various safety features across their facilities. This includes the installation of 647 safety locks, 128 crash bars with locks, 71 classroom/office doors, and 28 exterior doors. The project's primary objective is to upgrade the doors and door hardware at Worcester Public School, encompassing multiple school locations and to standardize products system wide.

The quantities listed are the quantities planned and bidders shall provide a total lump sum price for all items and installation services required herein.

SPECIFICATIONS

INTERIOR DOORS AND HARDWARE REPLACEMENT AT MULTIPLE SCHOOL BUILDINGS

PART 1 – GENERAL

1.1 Summary

Replace specified hardware on identified doors at the following sites:

Initial Five Schools

Chandler Elementary Community School, *114 Chandler Street, Worcester, MA. 01609*

- 17 New SAFEBOLT (or approved equivalent) Locks & Levers (sized accordingly)
- 11 New Privacy Function Lever
- 20 New Lockable Rim Exit Device

Chandler Magnet School, *525 Chandler Street, Worcester, MA. 01602*

- 70 New SAFEBOLT (or approved equivalent) Locks & Levers (sized accordingly)
- 11 New Privacy Function Lever
- 24 New Lockable Rim Exit Device

Elm Park Community School, *23 North Ashland, Worcester, MA. 01609*

- 56 New SAFEBOLT (or approved equivalent) Locks & Levers (sized accordingly)
- 36 New Privacy Function Lever
- 16 New Lockable Rim Exit Device
- 42 New Solid Wood Interior Door

Francis J McGrath Elementary School, *493 Grove Street, Worcester, MA. 01605*

- 17 New SAFEBOLT (or approved equivalent) Locks & Levers (sized accordingly)
- 14 New Privacy Function Lever
- 14 New Lockable Rim Exit Device

Union Hill School, *1 Chapin Street, Worcester, MA. 01604*

- 61 New SAFEBOLT (or approved equivalent) Locks & Levers (sized accordingly)
- 13 New Privacy Function Lever
- 2 New Lockable Rim Exit Device

Remaining Schools

Burncoat Street Preparatory School, *526 Burncoat Street, Worcester, MA. 01606*

- 29 New SAFEBOLT (or approved equivalent) Lock & Lever (sized accordingly)
- 2 New FRP Exterior Door w/ crash bars and locks
- 2 New FRP Exterior Door w/ crash bars and locks, with electric strike

City View Discovery School, *80 Prospect Street, Worcester, MA. 01605*

- 48 New SAFEBOLT (or approved equivalent) Locks & Levers (sized accordingly)
- 5 New Privacy Function Lever
- 6 New Lockable Rim Exit Device
- 4 New FRP Exterior Door w/ crash bars and locks

Flagg Street School, *115 Flagg Street, Worcester, MA. 01602*

- 34 New SAFEBOLT (or approved equivalent) Locks & Levers (sized accordingly)
- 6 New Privacy Function Lever
- 4 New Lockable Rim Exit Device

Goddard School of Science & Technology, *14 Richards Street, Worcester, MA. 01603*

- 83 New SAFEBOLT (or approved equivalent) Locks & Levers (sized accordingly)
- 11 New Privacy Function Lever
- 41 New Lockable Rim Exit Device

Grafton Street School, *311 Grafton Street, Worcester, MA. 01604*

- 53 New SAFEBOLT (or approved equivalent) Locks & Levers (sized accordingly)
- 9 New Privacy Function Lever
- 3 New Lockable Rim Exit Device
- 2 New Solid Wood Interior Door

Head Start – Millbury Street,

- 23 New SAFEBOLT (or approved equivalent) Locks & Levers (sized accordingly)
- 1 New Privacy Function Lever
- New Lockable Rim Exit Device
- 2 New Solid Wood Interior Door
- 12 New FRP Exterior Door w/ crash bar with locks
- 1 New FRP Exterior Door w/ crash bar with locks, with electric strike

Lake View School, *133 Coburn Avenue, Worcester, MA. 01604*

- 23 New SAFEBOLT (or approved equivalent) Locks & Levers (sized accordingly)
- 6 New Privacy Function Lever
- 2 New Solid Wood Interior Door

May Street School, *265 May Street, Worcester, MA. 01602*

- 44 New SAFEBOLT (or approved equivalent) Locks & Levers (sized accordingly)
- 3 New Privacy Function Lever
- 5 New Lockable Rim Exit Device
- 2 New Solid Wood Interior Door

Tatnuck Magnet School, *1083 Pleasant Street, Worcester, MA. 01602*

- 59 New SAFEBOLT (or approved equivalent) Locks & Levers (sized accordingly)
- 2 New Privacy Function Lever

Thorndyke Road School, *30 Thorndyke Road, Worcester, MA. 01606*

- 40 New SAFEBOLT (or approved equivalent) Locks & Levers (sized accordingly)
- 5 New Privacy Function Lever
- 1 New Solid Wood Interior Door

University Park Campus School, *12 Freeland Street, Worcester, MA. 01603*

- 34 New SAFEBOLT (or approved equivalent) Locks & Levers (sized accordingly)
- 1 New Privacy Function Lever
- 1 New Solid Wood Interior Door
- 3 New FRP Exterior Door, w/ crash bar with locks
- 1 New FRP Exterior Door, w/ crash bar with locks and electric strike

Vernon Hill School, *211 Providence Street, Worcester, MA. 01607*

- 81 New SAFEBOLT (or approved equivalent) Locks & Levers (sized accordingly)
- 8 New Privacy Function Lever
- 29 New Lockable Rim Exit Device
- 12 New FRP Exterior Door w/ crash bars and locks
- 2 New FRP Exterior Door, w/ crash bar with locks and electric strike

1.2.1 ACTION SUBMITTALS

Permits: Installer responsible for acquiring and payment for all required permitting.

Mandatory Pre-Bid Conference: A Mandatory Pre-Bid walk-through will be held on **May 15, 2024, at 3:00 PM**. The Pre-Bid Conference will begin at Chandler Magnet School, 525 Chandler Street Worcester, MA. 01602 and then proceed to three other schools: May Street School, 275 May Street Worcester, MA 01602, Elm Park Community Elementary School, 23 N. Ashland Street Worcester, MA 01609, and Head Start-Millbury Street, 389 Millbury Street Worcester, MA 01610. The walk-through will last as long as it takes to visit all four schools and should not exceed more than 3 hours.

All Bidders or their representatives are to meet at the site in the front office and document attendance on the conference "sign-in" sheet. Attendees and District Representatives will inspect the site. Questions will not be entertained at the site. Questions must be submitted via email to the City's Purchasing Department contact as noted elsewhere in these specifications. ***Bids will be accepted and evaluated only from those bidders that have signed in and are present at the walk-thru for all sites. Failure to attend the pre-bid conference shall be cause for disqualification and rejection of bid.***

Door Hardware Schedule: Prepared by or under the supervision of Installer, detailing fabrication and assembly of door hardware, as well as installation procedures and diagrams. Coordinate final door hardware schedule with doors, frames, and related work to ensure proper size, thickness, hanging, function, and finish of door hardware.

Existing Access Control Doors with Electric Strikes: Electric strike to be removed if necessary for new Rim Panic Device to be installed. New Panic Device to include electrified latch retraction and request to exit switch in the device.

Keying Schedule:

Prepared by or under the supervision of Installer, detailing Owner's final keying instructions for locks. Include schematic keying diagram and index each key set to unique door designations that are coordinated with the Contract Documents.

INFORMATIONAL SUBMITTALS

Product Certificates: for electrified door hardware, from the manufacturer, with specific hardware identified. Certify that door hardware approved for use on types and sizes of labeled fire- rated doors complies with listed fire-rated door assemblies.

CLOSEOUT SUBMITTALS

Maintenance Data: For each type of door hardware to include in maintenance manuals. Include final hardware and keying schedule, Quick Key Index, Floor plan with Key Marks, delivered on flash drive.

QUALITY ASSURANCE

Installer Qualifications: Supplier of products and an employer of workers trained and approved by product manufacturers.

Source Limitations: Obtain each type of door hardware within each category (SafeBolts, privacy locks, lockable rim exits devices, interior solid wood doors, exterior FRP doors) from a single manufacturer. For example, all SafeBolts or approved equal, across all buildings, shall be furnished by the same manufacturer. Because of the differing applications of each style lock/hardware category, different manufacturers will be expected and is allowable.

Electrified Door Hardware: Listed and labeled as defined in NFPA 70, Article 100, by a testing agency acceptable to authorities having jurisdiction.

Keying Conference: Key conference to be scheduled to create and review key system. Deliver keys upon completion of the project.

DELIVERY, STORAGE AND HANDLING

Inventory door hardware on site and provided in a secured room allocated by the owner.

Tag each item or package with identification coordinated with door and hardware schedule and floor plan

COORDINATION

Installation Templates: Distribute doors, frames, and other work specified to be factory-prepared. Check Shop Drawings of other work to confirm that adequate provisions are made for locating and installing door hardware to comply with indicated and existing requirements.

Electrical System Rough-In: Coordinate layout and installation of electrified door hardware with connections to power supplies and building safety and security systems.

Existing Openings: Where hardware components are scheduled for application to existing construction or where modifications to existing door hardware are required, field verify existing conditions and coordinate installation of door hardware to suit opening conditions and to provide proper door operation.

WARRANTY

Special Warranty: Manufacturer's standard form in which manufacturer agrees to repair or replace components of door hardware that fail in materials or workmanship within specified warranty period.

Warranty Period:	One year from the date of Substantial Completion, unless otherwise indicated.
Exit Mechanical Devices:	Five years from date of Substantial Completion.
Exit Electro-Mechanical Devices	Three years from date of Substantial Completion
Locksets:	Seven years from date of Substantial Completion

MAINTENANCE & SERVICE

- A. Maintenance Tools and Instructions: Furnish a complete set of specialized tools and maintenance instructions for Owner's continued adjustment, maintenance, and removal and replacement of door hardware.

PART 2 – PRODUCTS

PRODUCT DATA

- Interior Locks:
- a. SafeBolt Instant Button Activated Lockdown Locks - or approved equivalent
 - b. Corbin Russwin/ASSA Abloy Armstrong (CL3110-AZD - straight handle) Passage Door Lever Set or approved equivalent.
 - c. Wrap Around Plate for Cylindrical lock for 1 3/4" door or approved equivalent – field measurement required for assurance
 - d. Locks with interchangeable cores as described in "Cores/Keys"
 - e. Finish - Stainless steel, nickel silver, or Satin chrome.
- Interior Locks:
- a. Corbin Russwin/ASSA Abloy Armstrong (CL3120-AZD - straight handle) Privacy Door Lever Set or approved equivalent.
 - b. Wrap Around Plate for Cylindrical lock for 1 3/4" door– field measurement required for assurance
 - c. Locks with interchangeable cores as described in "Cores/Keys"
 - d. Finish - Stainless steel, nickel silver, or Satin chrome.
- Interior Crash bars:
- a. Von Duprin 98/99 or approved equivalent.
 - b. Allegion Double cylinder with security indicator (-2SI) with XB11-979 and XB13-379 (thumb turns) or approved equivalent
 - c. Surface-mounted vertical rods or rim devices where applicable
 - d. Locks with interchangeable cores as described in "Cores/Keys"
 - e. Finish - Stainless steel, nickel silver, or Satin chrome.
- Exterior Crash bars:
- a. Von Duprin 98/99 or approved equivalent.
 - b. Surface-mounted vertical rods or rim devices where applicable
 - c. Locks with interchangeable cores as described in "Cores/Keys"
- Exterior Door w/ Electric Strikes
- a. Electric strikes for Rim crash bars - HES 9600 or HES 9400 or approved equivalent.
 - b. Electric locks - Schlage ND96 series or approved equivalent.
- Interior Doors:
- a. Any manufacturer
 - b. Measurements: Contractor required to field measure all doors for dimensions and hardware selection accuracy.
 - c. Glass Measurements: 6" wide X 26" long; fire-rated
 - d. Standard New Hardware: hinges, strikes, door stop (application specific)
 - e. Color: stained to match existing doors and trim
 - f. Door Construction - 3 ply or 5 ply Construction – meets or exceeds industry standards of WDMA 1.S.1
 - g. Door Thickness - 1-3/4" Standard
 - h. Door Cores – 28-30 lb particle board – Meets or exceeds requirements of ANSI A208.1 and CS236-66
 - i. Door Undercut – 3/4" Standard
 - j. Door Sizes – Widths to 4'0" – Heights to 8'0"
 - k. Standard Preps – Lite Cutout, Cylindrical Locks (to meet SafeBolt and Privacy Locks reference in the specifications) w/ cutout for latch bolt
 - l. Fire-Rating – Non-fire rated (Optional 20-minute Fire labeled and fire glass)

- m. Vision Lite Frame Construction – 20 or 18 gauge steel
- n. Vision Lite Frame Brands – Air Louvers, National Guard, Rockwood or approved equivalent
- o. Vision Lite Frame Finish – Bronze, Gray, Black or Primed Gray
- p. Glass Types – 1/4" Clear Tempered, 1/4" Fire-Rated Wire, 3/16" Fire-rated Pyran Platinum F
- q. Mfg Hinge/Lock Locations – Steelcraft, Timely, Western Integrated, or custom locations as required.

Exterior Doors:

- a. Commercial-grade Fiber-reinforced panel doors - any manufacturer
- b. Glass Measurements: 6" W x 26" H
- c. Hinges: continuous hinge mounted to the existing frame, existing trim and frame to remain
- d. Measurements: Contractor required to field measure all doors for dimensions and hardware selection accuracy.
- e. Color: selected by owner
- f. Door Thickness - 1-3/4" thickness.
- g. Door Construction - Face sheets are commercial quality 1/8" in thickness. Door faces and vertical edges are flush with no visible seams. Face sheets are totally supported by polyurethane adhesive. High Density polyethylene blocking to be located at each hardware location, pre-drilled pilot holes. Doors are Seamless in design.
- h. Core Construction - Density of foam core exceeds 2 pcf and has a crush strength of 3600 psf.
- i. Warranty - Doors have a full lifetime warranty.
- j. Hinges - Hinge edges are prepared for full height piano-style hinges.
- k. Locks - Lock edge has a standard bevel and is prepared for specified hardware.
- l. Door Closer - Closer reinforcement to be pultruded FRP blocking.
- m. Finish: - Doors are supplied with one coat of factory primer or two-part polyurethane enamel finish coating from a selection of standard colors or custom colors as specified

Cores/Keys:

- a. Keyed-alike with interchangeable cores
- b. Corbin Pyramid Core Satin Chrome or approved equivalent.
- c. Owner to provide a key schedule, each building will have a separate key schedule

SCHEDULED DOOR HARDWARE

Provide door hardware for each door as scheduled in the Door Hardware Schedule to comply with requirements in this Section.

Door Hardware Sets: Provide quantity, item, size, finish or color indicated, and products equivalent in function and comparable in quality to named products by other listed manufacturers.

Sequence of Operation: Provide electrified door hardware function, sequence of operation, and interface with other building control systems indicated.

MECHANICAL LOCKS AND LATCHES

General: Provide lock functions as indicated in the door hardware schedule.

Verify all Lock Functions with the owner before ordering. Ordering incorrect lockset function without verification will result in furnishing new locksets at no cost to the owner.

KEYING

- Furnish all items specified, scheduled, shown or required herein
- Conduct and furnish itemized site Survey
- Conduct and furnish Key System Plan
- Furnish Key System Schedule
- Furnish Key System Schematic
- Conduct and Furnish Key Meetings and Provide all Documentation

PART 3 - EXECUTION

INSTALLATION

Examination: Examine doors and frames, before ordering and installation for compliance with requirements for installation tolerances, labeled fire-rated door assembly construction, wall and floor construction, and other conditions affecting performance. A measurement of the individual locations in each building will provide the necessary information to develop the door, materials, and hardware schedule. The awarded vendor shall provide a door and hardware schedule to the owner for approval.

Field Verify all openings for existing conditions and provide all materials and workmanship to convert existing doors and hardware to hardware as indicated in the hardware schedule.

Contractor required to field measure all doors for hardware selection accuracy.

Kick off meeting required to discuss project specifics and schedule ahead of start of work.

Product submittals shall be sent to the owner for approval prior to ordering.

All existing hardware and doors to be removed and disposed of by the contractor.

All work on the first five schools (and any additional schools if the awarded bidder finishes early) to be performed after school hours (typically 3:00 pm-10:00 pm) Monday-Friday, unless otherwise approved in advance in writing by the owner. The remainder of the work, after June 30, 2024, can be completed between the hours of 7:00 am - 3:00 pm.

The contractor is required to supply 4 keys per lock, clearly tagged.

The contractor is to verify the completed operations of all hardware and doors with the owner present.

The contractor is required to clean up after themselves and remove their trash daily.

The contractor is not to put any trash in Worcester Public Schools' dumpsters.

W.P.S. will provide a set of floor plans identifying doors to be addressed to the contractor that has been awarded this project.

The project may commence upon contract execution and issuance of a notice to proceed by WPS.

The initial five schools—Chandler Magnet, Chandler Elementary, Elm Park, Francis J. McGrath, and Union Hill—are required to be finished by June 30, 2024, while the rest of the schools must be completed by August 23, 2024.

Quality

The CL3100 series is a Grade I lever lockset manufactured with the highest quality materials to ensure strength, durability and quiet operation. Available in all standard architectural finishes, the CL3100 series subtly complements any high-use commercial, industrial and institutional application.

T-Zone Construction

Direct linkage with fixed alignment between the hub and the latchbolt is the best construction for quietly and effectively operating the latchbolt. For this reason, Corbin Russwin interlocks the aligning and latch tubes, which form a rugged torque resistant “T” in the critical twist area. This “T-Zone” construction, combined with long lasting components, makes T-Zone Lever locks outstanding!

Vandal Resistance

The Corbin Russwin CL3100 Series* follows a higher standard for Grade I bored locks. The

unique T-Zone construction provides strength and durability by true interlocking between the lockbody and the latch far exceeding the ANSI/BHMA A156.2 Series 4000 Grade I standards.

*Patented design and construction

Applications

- High traffic areas
- Offices
- Public buildings
- Hospitals
- Institutions
- Educational facilities – K-12 and Universities
- Retail

Key Advantages

- UL Cycle above and beyond test completed at 7.6 Million Cycles. Verification ID: V875753

- Several security key systems available (Access 3®, Pyramid, etc.)
- Fits most standard door preps
- Only 45 degrees of lever rotation required to retract latchbolt
- 18 functions. Many of which are easily field changeable
- 3 levers and 4 roses available to cover a wide variety of door preps and design requirements
- Simple cylinder removal. Easy change outs.
- T-Zone construction tested to over 15 million cycles, exceeding ANSI/BHMA Grade 1 standards by 15 times.

®

MicroShield

ASSA ABLOY Group companies offer MicroShield®, an anti-microbial coating for door hardware. MicroShield uses proven silver ion-based technology from Agion®, a leading provider of antimicrobial solutions, to stem the spread of bacteria and other microbes.

MicroShield® is a registered trademark of ASSA ABLOY Access and Egress Hardware Group, Inc.

The Agion antimicrobial is not intended as a substitute for good hygiene. Coated products must still be cleaned to ensure the surfaces will be free of destructive microbes. ASSA ABLOY makes no representations or warranties, express or implied, as to the efficacy of the Agion antimicrobial. A copy of the Agion warranty is available at www.agion.com. Agion is a registered trademark of Agion Technologies, Inc., Wakefield, MA, USA.

Features

Handing

Non-handed

Door Thickness

1-3/4" (44mm) - 2" (51mm) standard. Optional: Over 2" (51mm) - 2-1/4" (57mm); see Quick Codes, page 13.

Door Prep

ANSI/BHMA A156.115 (161)

Lock Chassis

Steel, zinc dichromated for corrosion resistance.

Backset

2-3/4" (70mm) standard.
Optional: 3-3/4" (95mm) and 5" (127mm); see Quick Codes, page 13.

Bearing Assembly

Cast and machined stainless steel

Latchbolt

Stainless steel bolt 7/8" (22mm) diameter x 1/2" (13mm) throw.
Optional: 3/4" (19mm) throw fire latch.

Front

Wrought brass or stainless steel, 2-1/4" (57mm) x 1-1/8" (29mm).
Accommodates flat front doors and doors beveled 1/8" (3mm) in 2" (51mm).

Strike

Wrought brass or stainless steel ANSI curved lip standard, 4-7/8" (124mm) x 1-1/4" (32mm) x 1-1/4" (32mm) lip to center.
Optional: strikes, lip lengths and ANSI wrought strike box available.
See Quick Codes, page 13.

Levers

Secured with 6 lobe security set screw standard

Warranty

Ten-year limited.

Classroom Security The CL3152 Classroom Intruder function is the solution to classroom

security: a double cylinder lockset that allows

locking of the outside lever from either side. Egress is always possible with the standard anti-panic feature, whether the door is locked or not.

STC55 Sound Transmission Class Rated Product (M112)

Corbin Russwin CL3100 Series Lever Locks are part of the STC Acoustical Door Systems from ASSA ABLOY Group brand Security Metal Products (SMP).

This solution encompasses door, frame, sounds seals and threshold, and lock. The STC55 requires a special version of the CL3100 Lever Lock. To order the CL3100 Series Lever Lock for use with STC55 door system, include the M112 quick code in the order string and specify the C or K rose only. With this prefix, it will be configured for a 1-3/4" door with a 3/4" panel for 1-1/2" total thickness. Door handing is required to dictate panel location. Functions are limited to the following: CL3110, CL3151, CL3155, CL3157, CL3172 and CL3180.

To learn more about SMP and the STC 55 Acoustical Door System, please visit www.secmet.com

Certification/Compliance

ANSI/BHMA

Exceeds A156.2 Series 4000,

BHMA

Grade I.

Meets A117.1 Accessibility Code.

California State Reference Code

(Formerly Title 19, California State Fire Marshal Standard)

All levers with returns comply; levers return to within 1/2" (13mm) of door face.

UL-cUL

UL and cUL listed to Canadian Safety Standards

Listed for 3 Hour Doors

All locks with 1/2" (13mm) throw listed for A label and lesser class 4' x 10' single doors. All locks with 3/4" (19mm) throw latchbolt listed for A label and lesser class 8' x 10' pairs of doors. Letter F and UL symbol on latch front indicate listing.

Any retrofit or other field modification to a fire-rated opening can potentially impact the fire-rating of the opening, and Corbin Russwin, Inc. makes no representations or warranties concerning what such impact may be in any specific situation. When retrofitting any portion of an existing fire-rated opening, or specifying and installing a new fire-rated opening, please consult with a code specialist or local code official (Authority Having Jurisdiction) to ensure compliance with all applicable codes and ratings.

A.D.A.

All levers conform to ADA requirements for barrier-free accessibility.

MicroShield®

CL3100 series locks are available with MicroShield® antimicrobial coating. *MicroShield* is a revolutionary hardware finish coating, using a silver ion based technology, which inhibits the growth of bacteria, algae, yeast, fungus, mold and mildew. *MicroShield* is non- toxic and lasts for the lifetime of the finish to which it is applied. To order, suffix option code “C”.

Note: MicroShield® coating may vary finish color from architectural standards. *MicroShield* is not intended as a substitute for traditional infection control programs such as hand hygiene or use of disinfectants. Coated product must still be cleaned to insure the surfaces will be free of destructive microbes. Corbin Russwin makes no representations or warranties, express or implied, as to the efficacy of the *MicroShield* antimicrobial.

Zinc levers are plated to match ANSI/BHMA finish.

CL3100.13

How To Specify

CL3100 Series

CL3100 Series Suggested Specification

All locksets shall be CL3100 Series Vandal Resistant Lever Locksets as manufactured by Corbin Russwin Architectural Hardware. A

single lock chassis shall accommodate 1-3/4" (44mm) to 2-1/4" (57mm) door thickness. Locksets shall be non-handed.

Locksets shall be able to withstand 3000 inch pounds of torque applied to the locked lever without gaining access.

Locksets shall have solid cast levers without plastic fillers. Outside lever handles shall be a minimum of 4-5/8" (117mm) in length and shall provide a minimum of 2" (51mm) clearance from the surface of the door to the inside of the lever at the midpoint. Outside lever handles may return to within 1/2" (13mm) of the door surface. Levers on keyed locksets shall be removable only when the designated key is in the cylinder.

Locksets shall be able to fit a standard 2-1/8" (55mm) bore without the use of thru-bolts. Standard rose size shall be 3-1/2" (89mm) in diameter.

Latchbolt head shall be one piece stainless steel. Latchbolt assembly shall be encased within the lock body. Lockset shall

have 2-3/4" (70mm) backset, standard.

A single lockset shall accommodate a 6 or 7-pin conventional cylinder and all levers of master keying, construction master keying, visual key control, security, high security and interchangeable core. Cylinders may be easily changed by removing the lever without disassembling the lockset.

Locksets required for fire doors shall be listed by UL for ratings of A label (3 hours) and less, for doors up to 4'0" (1.2m) x 10'0" (3m) and pairs of doors 8'0" (2.4m) x 10'0" (3m). A 3/4" (19mm) throw Latchbolt for pairs of fire doors shall be standard.

Locksets shall be cycle tested per ANSI/BHMA A156.2, to eight (8) million cycles without any visible lever sag.

Certification:

Exceeds ANSI/BHMA A156.2 Series 4000, Grade I

UL and cUL listed to Canadian safety standards

UL-cUL listed for 3 Hour doors

All levers conform to ADA requirements for barrier free accessibility

Meets UL 10C and UBC 7-2

UL Listed: ANSI/SDI-BHMA A250.13; ANSI/ASTM E330-2002

ANSI/ASTM 31886-2005 & ASTM 31996-1009

UL Certification Directory ZHEM.R21744 Latching Hardware

Listed on Florida Building Code Website: FL4351-R1

Meets ANSI A117.1 Accessibility Code.

California State Reference Code (formerly Title 19, Cal. State Fire Marshal Standard). Lockset

shall carry a ten (10) year limited warranty.

MicroShield

ASSA ABLOY Group companies offer MicroShield[®], an anti-microbial coating for door hardware. MicroShield uses proven silver ion-based technology from Agion[®], a leading provider of antimicrobial solutions, to stem the spread of bacteria and other microbes.

MicroShield[®] is a registered trademark of ASSA ABLOY Access and Egress Hardware Group, Inc.

The Agion antimicrobial is not intended as a substitute for good hygiene. Coated products must still be cleaned to ensure the surfaces will be free of destructive microbes. ASSA ABLOY makes no representations or warranties, express or implied, as to the efficacy of the Agion antimicrobial. A copy of the Agion warranty is available upon request. Agion is a registered trademark of Agion Technologies, Inc., Wakefield, MA, USA.

VON DUPRIN®

98/99 Series

Exit device – push bar

Overview

The 98/99 Series have all been certified to the highest industry standards and are Von Duprin's most premium offering. The 98/99 Series are high-performance, wide stile heavy-duty exit devices featuring push pads that offer many customizable options.

Features and benefits

- Built-in flexibility with a universal center case that provides migration path to new technology
- Highly modular allowing product upgrades to meet customer's changing needs
- Easy maintenance with extensive serviceable parts options

Security indicators

2SI

Security indicator option

CDSI/HDSI D

Dogging indicator option

Overview

Designed for high use and abuse institution environments, such as schools and hospitals, these Von Duprin® products are recommended for the following applications:

- Visual verification - Reduce the time it takes to tour your facility and ensure each door is secure by installing the Von Duprin security indicator to provide at-a-glance visual verification.
- Lockdown - Lock down high occupancy areas such as auditoriums, cafeterias and gymnasiums, from inside the room with the Von Duprin security indicator that provides positive visual confirmation.

The CDSI/HDSI dogging indicator provides an at-a-glance verification of the status of the door from inside of the room. Visible "LOCKED" and "UNLOCKED" indicators show whether the device is undogged or dogged. This feature can be used with hex key (HDSI) or cylinder dogging (CDSI) options on various device types—rim, mortise and vertical systems.

The -2SI Security Indicator provides an at-a-glance verification of the LOCKED/UNLOCKED status of the door from inside of the room. This option can be ordered as a new product or as a retrofit conversion kit to an existing 98/99 device.

Features and benefits

- Lockdown solution that meets fire and life safety codes for free egress
- Modular conversion kits allow you to quickly and easily upgrade your existing devices
- Visual indication of whether the exit device is locked or unlocked from inside a room

2SI security indicator with double cylinder

- Pad-printed directional indicator provides a clear direction of rotation to secure opening
- Available for 98/99 Series devices

CDSI/HDSI dogging indicator

- Hex or cylinder dogging options
- Visual indication of whether the exit device is dogged or undogged
- Available for 98/99 and 33A/35A Series panic devices
