- We are interested in bidding on the attached RFQ, but wanted to ask if we would still be considered if the integrated calendar has all the features requested but only shows a grid of the information and not a calendar view?"
A grid view will be considered acceptable so long as all important information is available in an easy to view way. The calendar's ease of viewing will be evaluated during the demonstration.
- A second question that we have is how many users will need read/write access to the system and how many will need read only?"
All users will need some level of write access. The access shall depend on their particular roles. For example; samplers shall have limited access to log just sampling information, whereas laboratory staff shall have greater access to data entry.

Proposers are requested to acknowledge and/or include this addendum with submission.
All other terms, conditions and specifications remain unchanged.

Very truly yours,

Christopher J. Gagliastro
Purchasing Director
