2. We will need the hinge cutout size on the frame side of these 7 doors to match the new doors being installed. *See above.*
3. For Union Hill Building 1, the new Door 19 has a 5-foot opening with no existing doors. Would this require building a new partition with a 3' x 80" door? ***This installation of a door in this area has been eliminated. There will not be a need to build out a partition wall and install a new door and frame.***
4. Are continuous hinges permitted for any new door installations? ***Only if the existing hinge openings are non-functionable.***
5. Regarding Vernon Hill School, Door #13 is currently equipped with an exit device and a rim cylinder on the outside (always locked). Would it be acceptable to replace only the rim cylinder to match the new keying while keeping the existing exit device in place? ***Yes.***

Bidders are requested to acknowledge and/or include this addendum with submission. All other terms, conditions and specifications remain unchanged.

Very truly yours,
