To All Bidders:

Subject: **Bid No. CR-8611-J6 – Traffic Signal Equipment / DTM**

ADDENDUM NO. 1

To Whom It May Concern:

With reference to our bid request relative to the above subject, please refer to the changes/modifications/clarifications to the original proposal request.

Question received by this office and responses from The City:

Question #1

Item 602.81 Opticom 2 channel phase selector (700 series)

Item 602.82 Opticom 4 channel phase selector (700 series)

Item 602.84 Opticom Detector (700 series) One Way Detector

Item 602.85 Opticom Detector (700 series) Two Way Detector

These item descriptions seem to be specific to GTT/Miovision Opticom. There is no written specification only what is shown above on item list. Can we quote Tomar optical preemption which has phase selectors and detectors that will work in the GTT system and is compatible with GTT emitters.

Answer #1

Vendors may supply emergency vehicle preemption phase-selectors, detectors, and card racks from alternate manufacturers that are compatible with Global Traffic Technologies (Miovision) emitters and other GTT/Opticom components. All parts must be on the MassDOT Qualified Traffic Control Equipment (QTCE) list.

Bidders are requested to acknowledge and/or include this addendum with submission. All other terms, conditions and specifications remain unchanged.

Very truly yours,

Jerry Kucera
Buyer
