ITEMS 1 THRU 8

Description: Eight pallets of surplus abrasive from a water tank rehabilitation project. The exact mixture of the “blend” is unknown. Below is the material specifications from the contract bid documents used for the tank rehabilitation. Material is covered with tarps for protection. City personnel will provide equipment for loading material on site. Buyer is responsible for transporting material off site.

FROM BID SPECIFICATIONS

2.01 ABRASIVES

- A. Abrasive shall be in conformance with Type 1 or Type 2, Class A, Grade 3 as outlined in SSPC-AB1. A Type 1 abrasive is a natural mineral, Type 2 is a slag abrasive, Class A contains Crystalline silica less than or equal to 1% and Grade 3 is an abrasive that produce surface profiles of 2.0 to 3.5 mils. The abrasive shall be properly stored, and it shall be free from contaminants, including but not limited to paint, earth, moisture, oil or chlorides, which can cause premature failure of the coating. Use of abrasive on the interior or exterior surfaces of the tank shall be based not only on its compliance with the technical application of the coatings, but also on its lack of nuisance to surrounding property. The CONTRACTOR shall submit to the OWNER for approval manufacturer's published product data sheets for the type of abrasive, grade, and the resulting profile of the abrasive to be used for the work prior to the start of any cleaning operations.

The abrasive is to be premixed with a hazardous waste minimization material such as Blastox™ or equal to compensate for the disposal requirements for lead based paint. The Blastox™ or equal is to be mixed with the abrasive at the abrasive supplier's facility in the proper quantities and ratios to compensate for the existing lead levels in the coatings. On site mixing of the Blastox™ or equal will not be allowed.

Recyclable steel grit will be accepted as an alternate abrasive media provided it is new and has not been used on any other lead paint removal project.

Documentation stating the grit has not been used on previous lead paint removal projects is required.
